

CKCS Tech Night

Presented by

About Joey & Craig

Two technology enthusiasts...

About Us

We share the same birthday, and we both have been blessed with 3 awesome children, and wives who put up with our crap. We have known each other for over 13 years, worked together, argued together and still present at CKCS every year.

More Questions

More answers

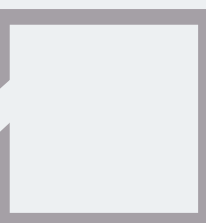

Our topics for tonight

Not to bore you...

- What PC do I buy?
- The Cloud (Drop Box, Google Drive...etc)
- Smart Phones
- Online Backups

Lets Start

Ask questions as you like

What PC do I buy?

Mac or PC

This can be a challenging question, and one you need to think about before you buy.

The Cloud

What Is It?

So many options, before you decide...figure out what your needs are

Smart Phones

Apple or Android?

Can't I just go back to the flip phone like Jack Bauer?

Online Backups

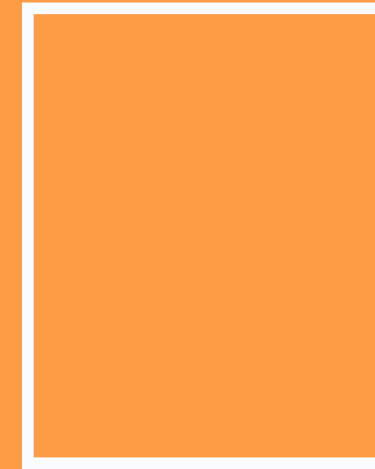

Is it Safe?

Do we need external hard drives anymore for backups?

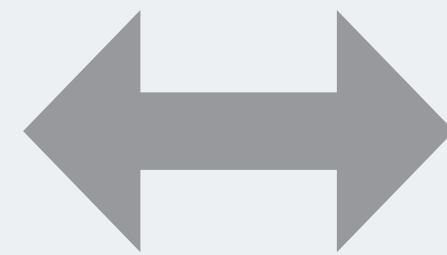

What PC

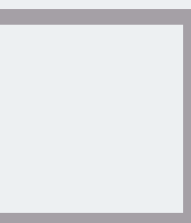

Do you buy?

The PC or MAC?

- Though desktops are cheaper than laptops and repair costs are also less with desktops, but are you sure you want a desktop?
- Desktops take more space
- Can't be moved easily
- They are cost effective
- They can easily be upgraded
- Great for email, online shopping and Social media

The MAC

A new type of computer

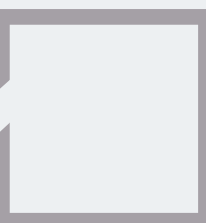

MAC OS X

After you spend some time in the system, it begins to feel easy and there will be many things which you like and dislike.

Are you ready for a MAC?

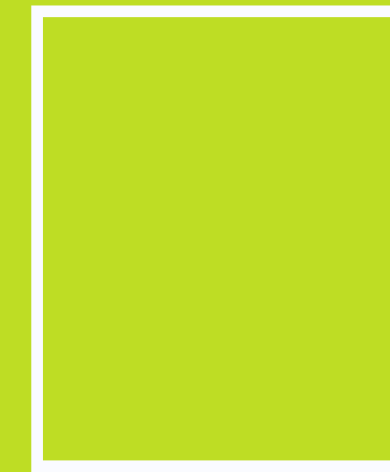

Consider what you want your computer for? Consider if you like mobility? The new MAC's are by far superior in many ways to the PC, however they have a steep price tag and upgrades are not easy.

- Expensive
- Reliable and easy to use
- They work

The Cloud

What is it?

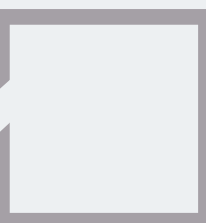

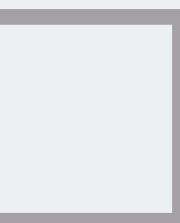

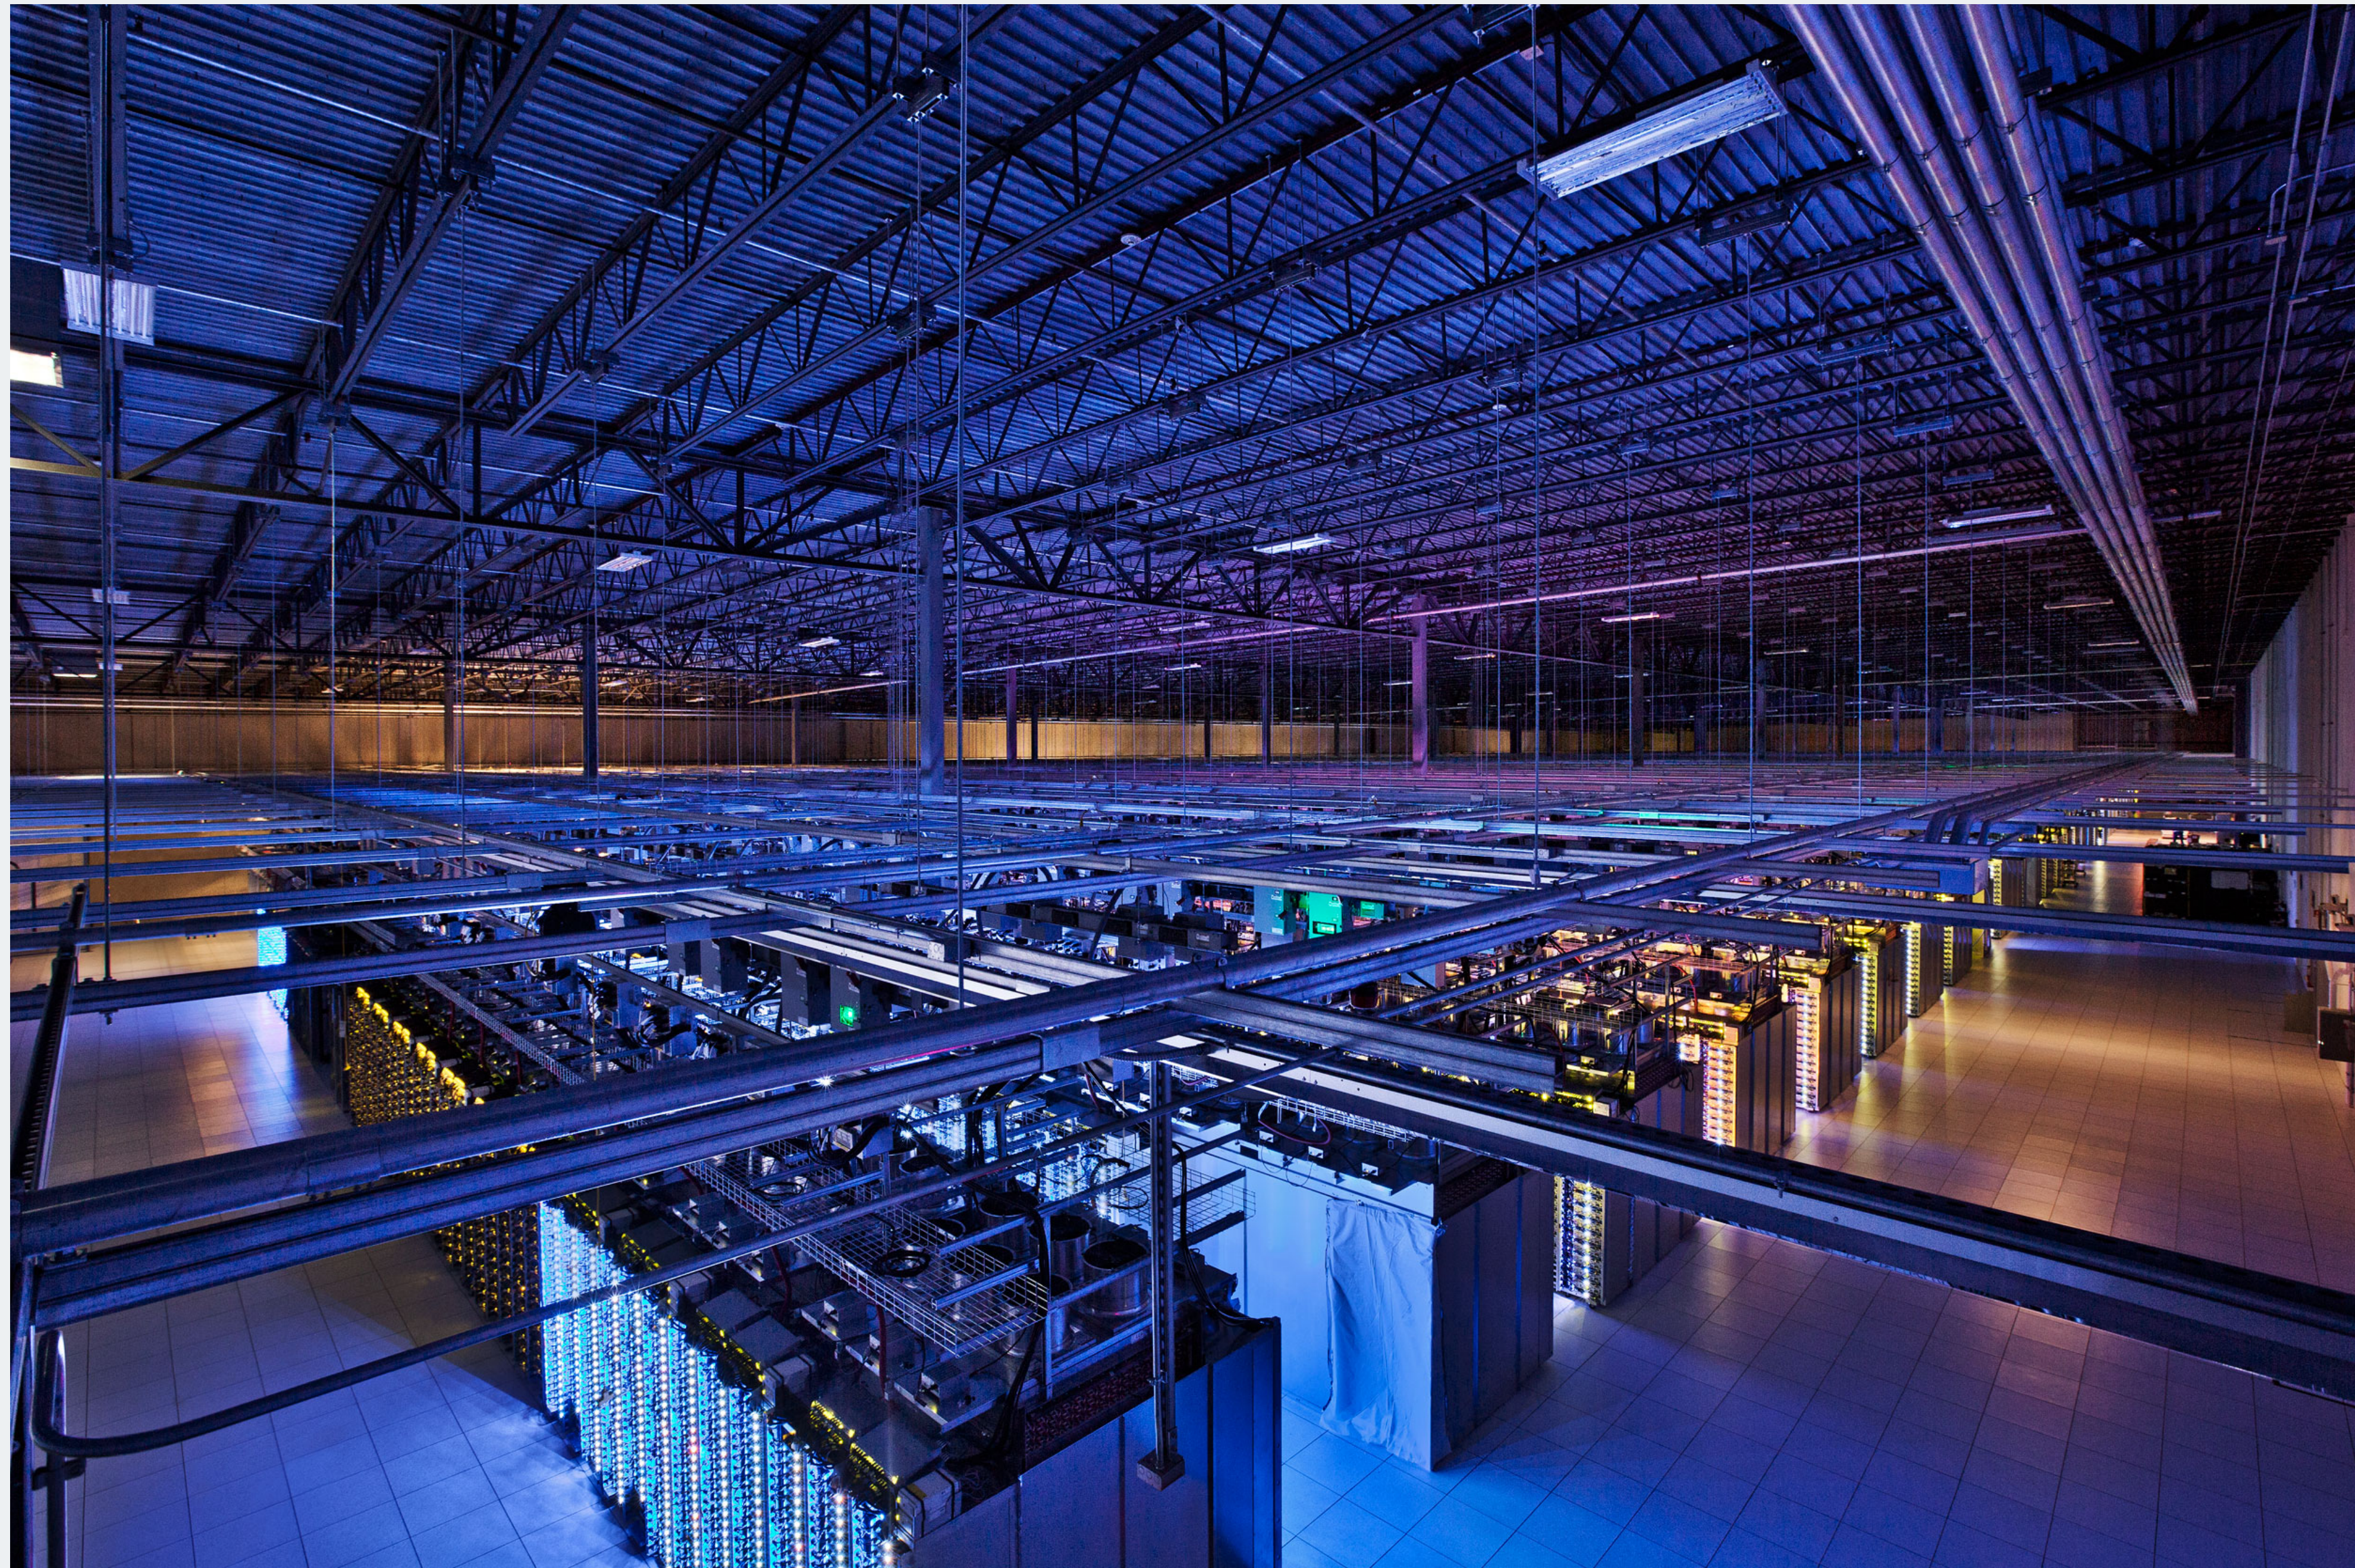

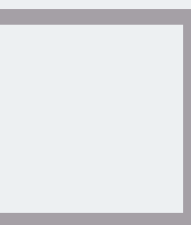

Cloud computing is a recently evolved computing terminology or metaphor based on utility and consumption of computing resources. Cloud computing involves deploying groups of remote servers and software networks that allow centralized data storage and online access to computer services or resources.

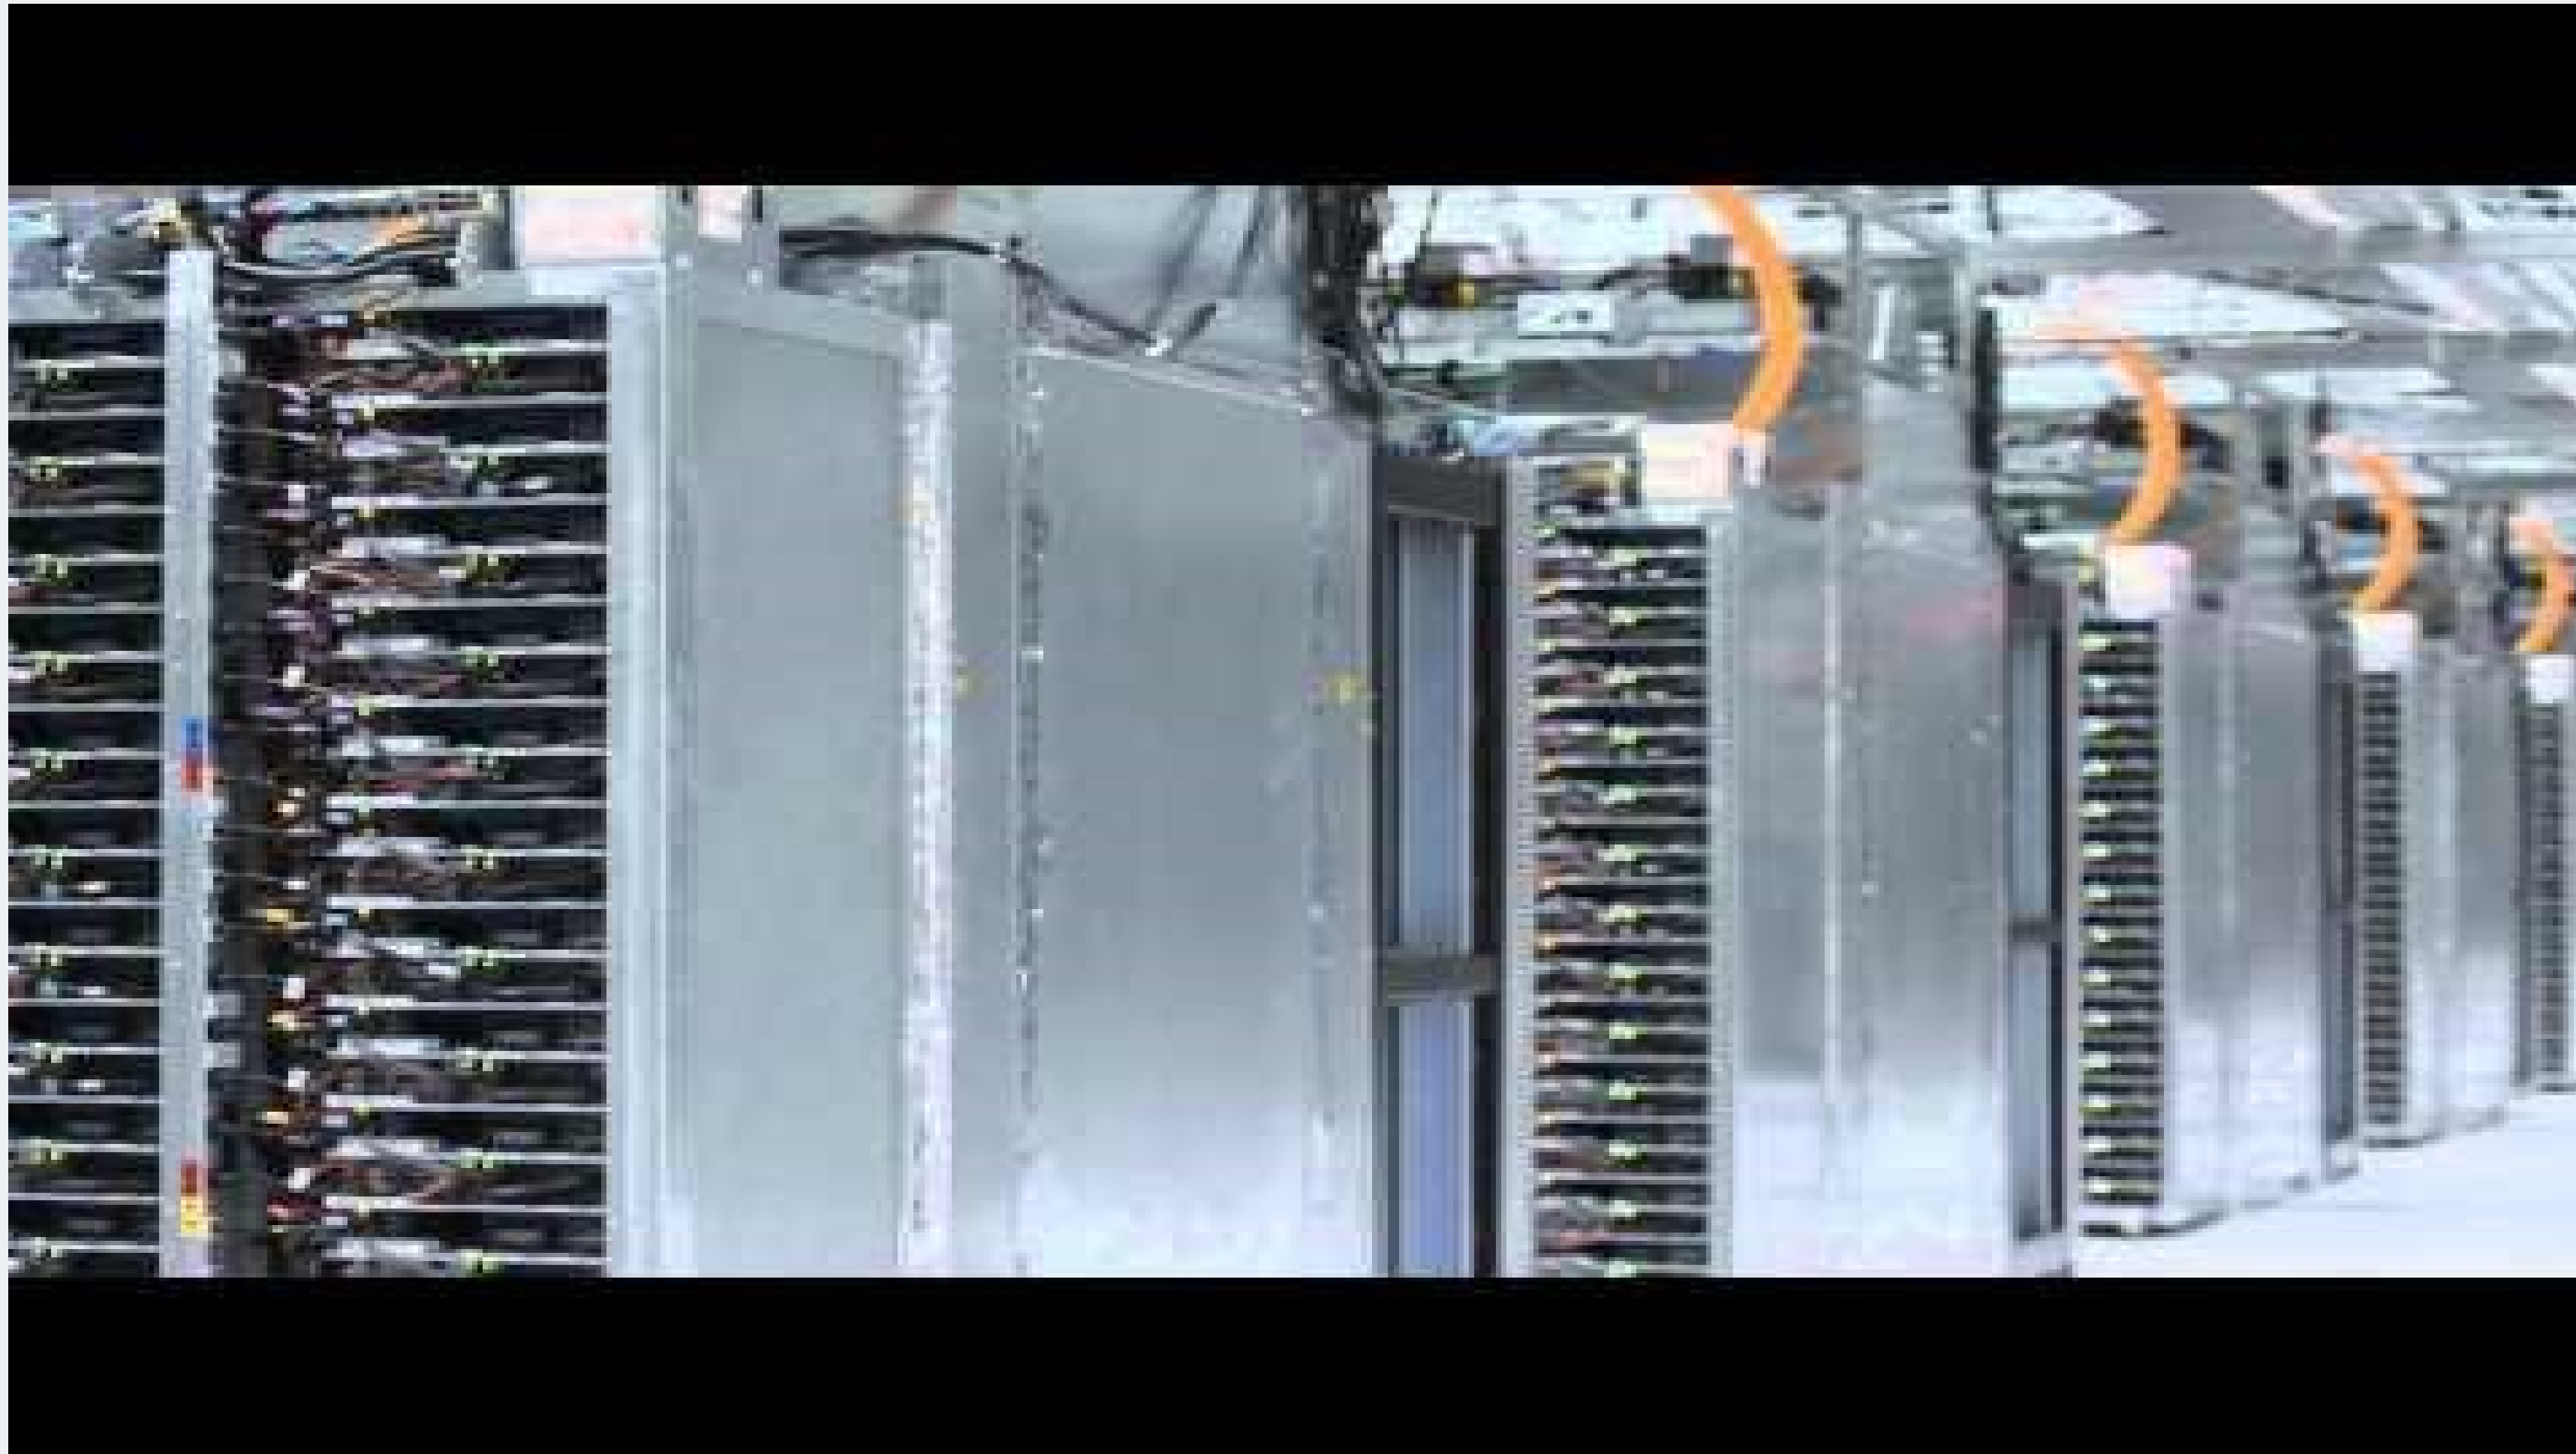

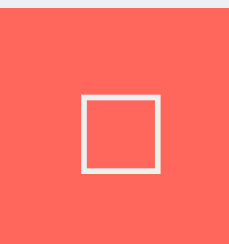

In other words...all of your data anytime, anywhere, always online.

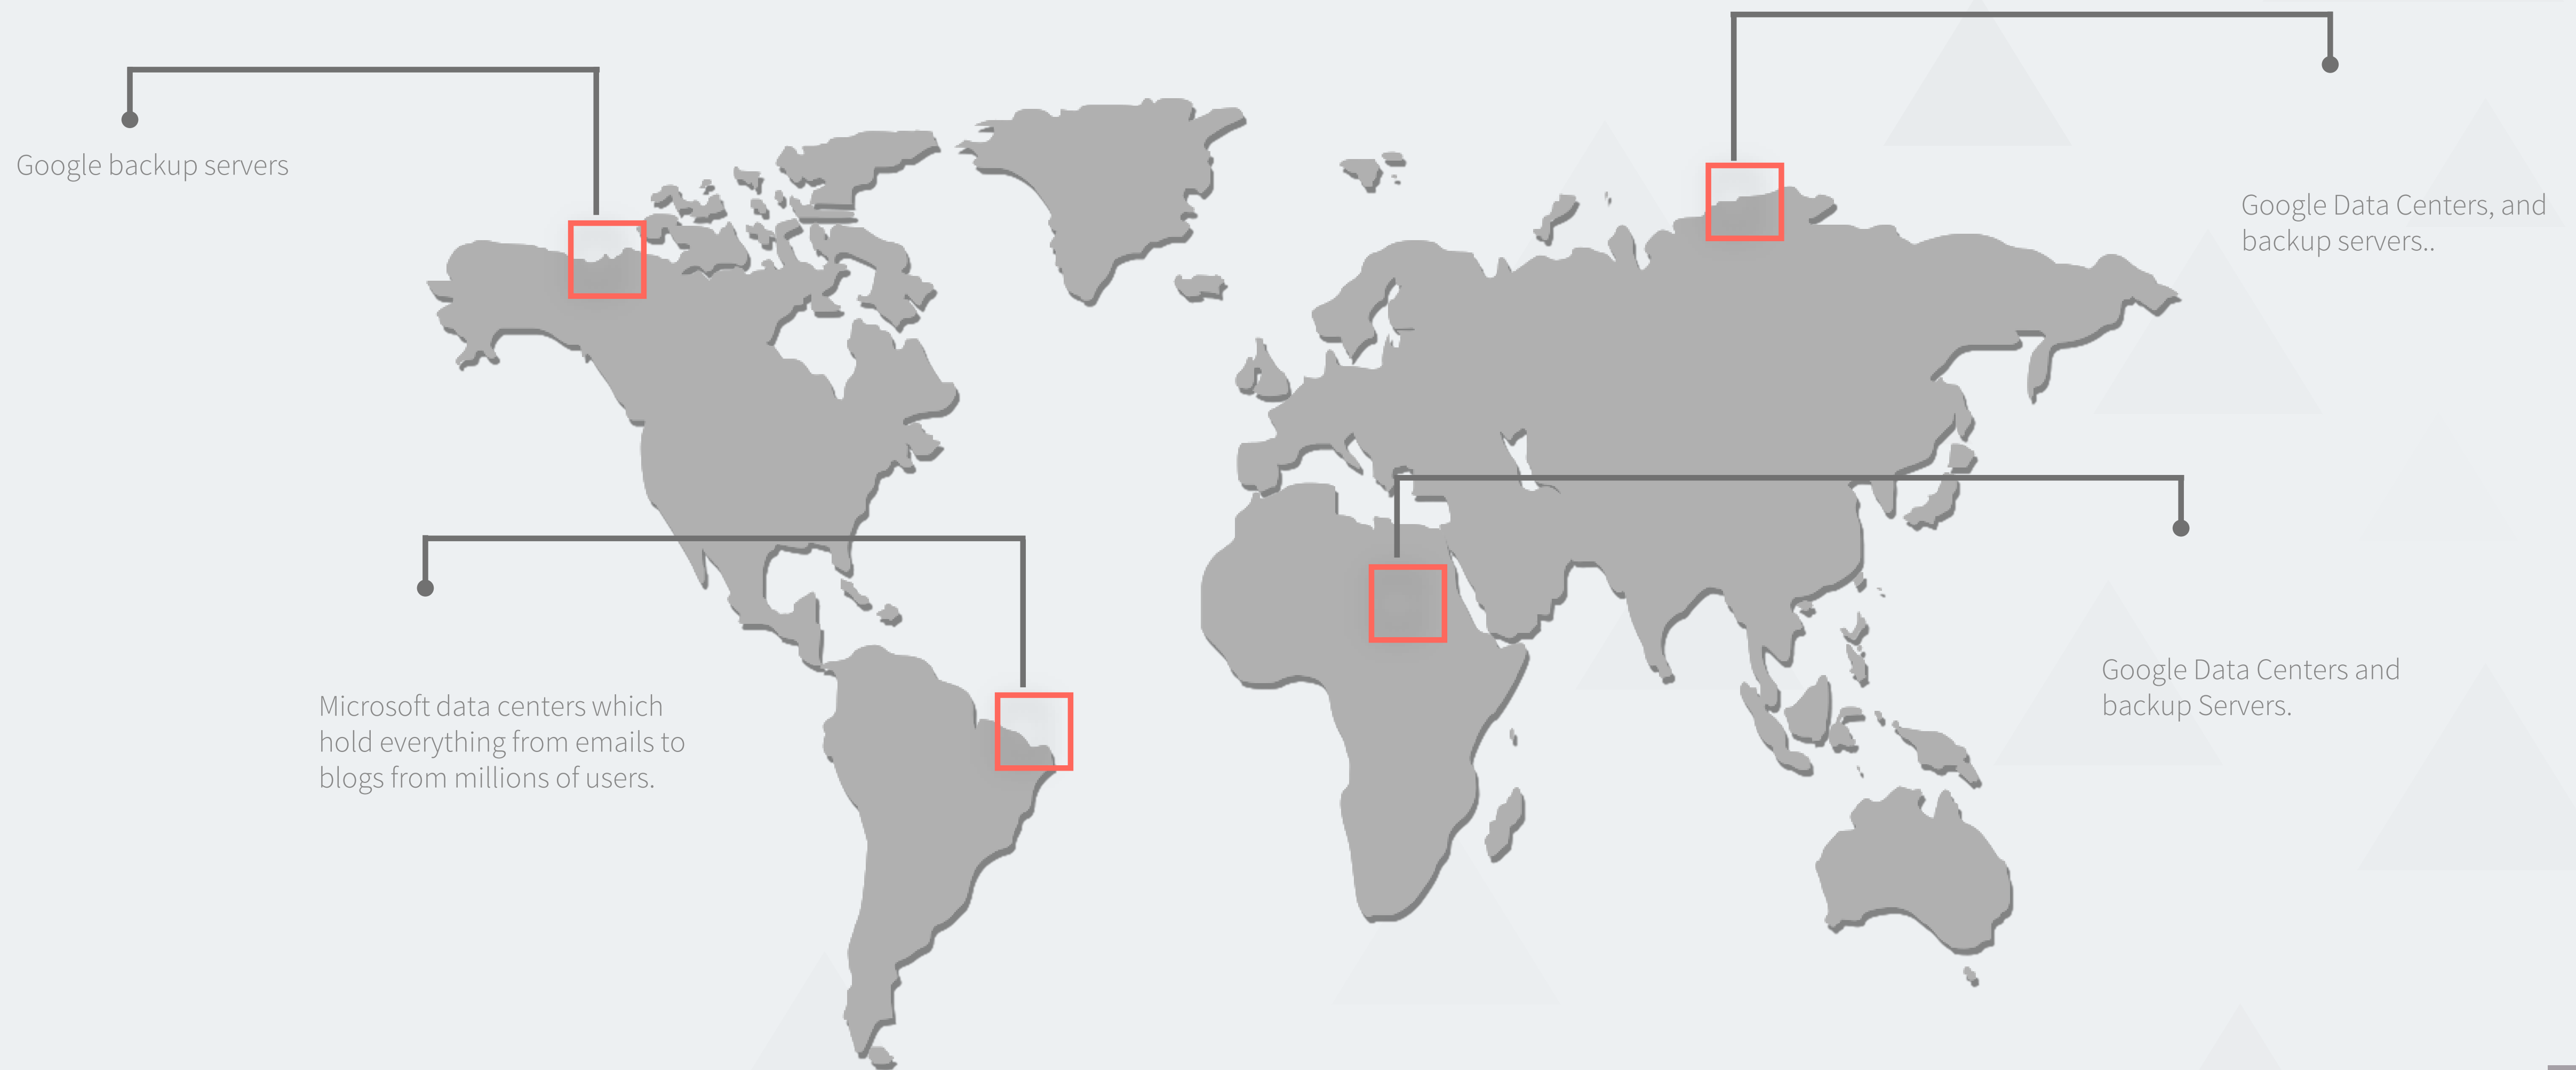

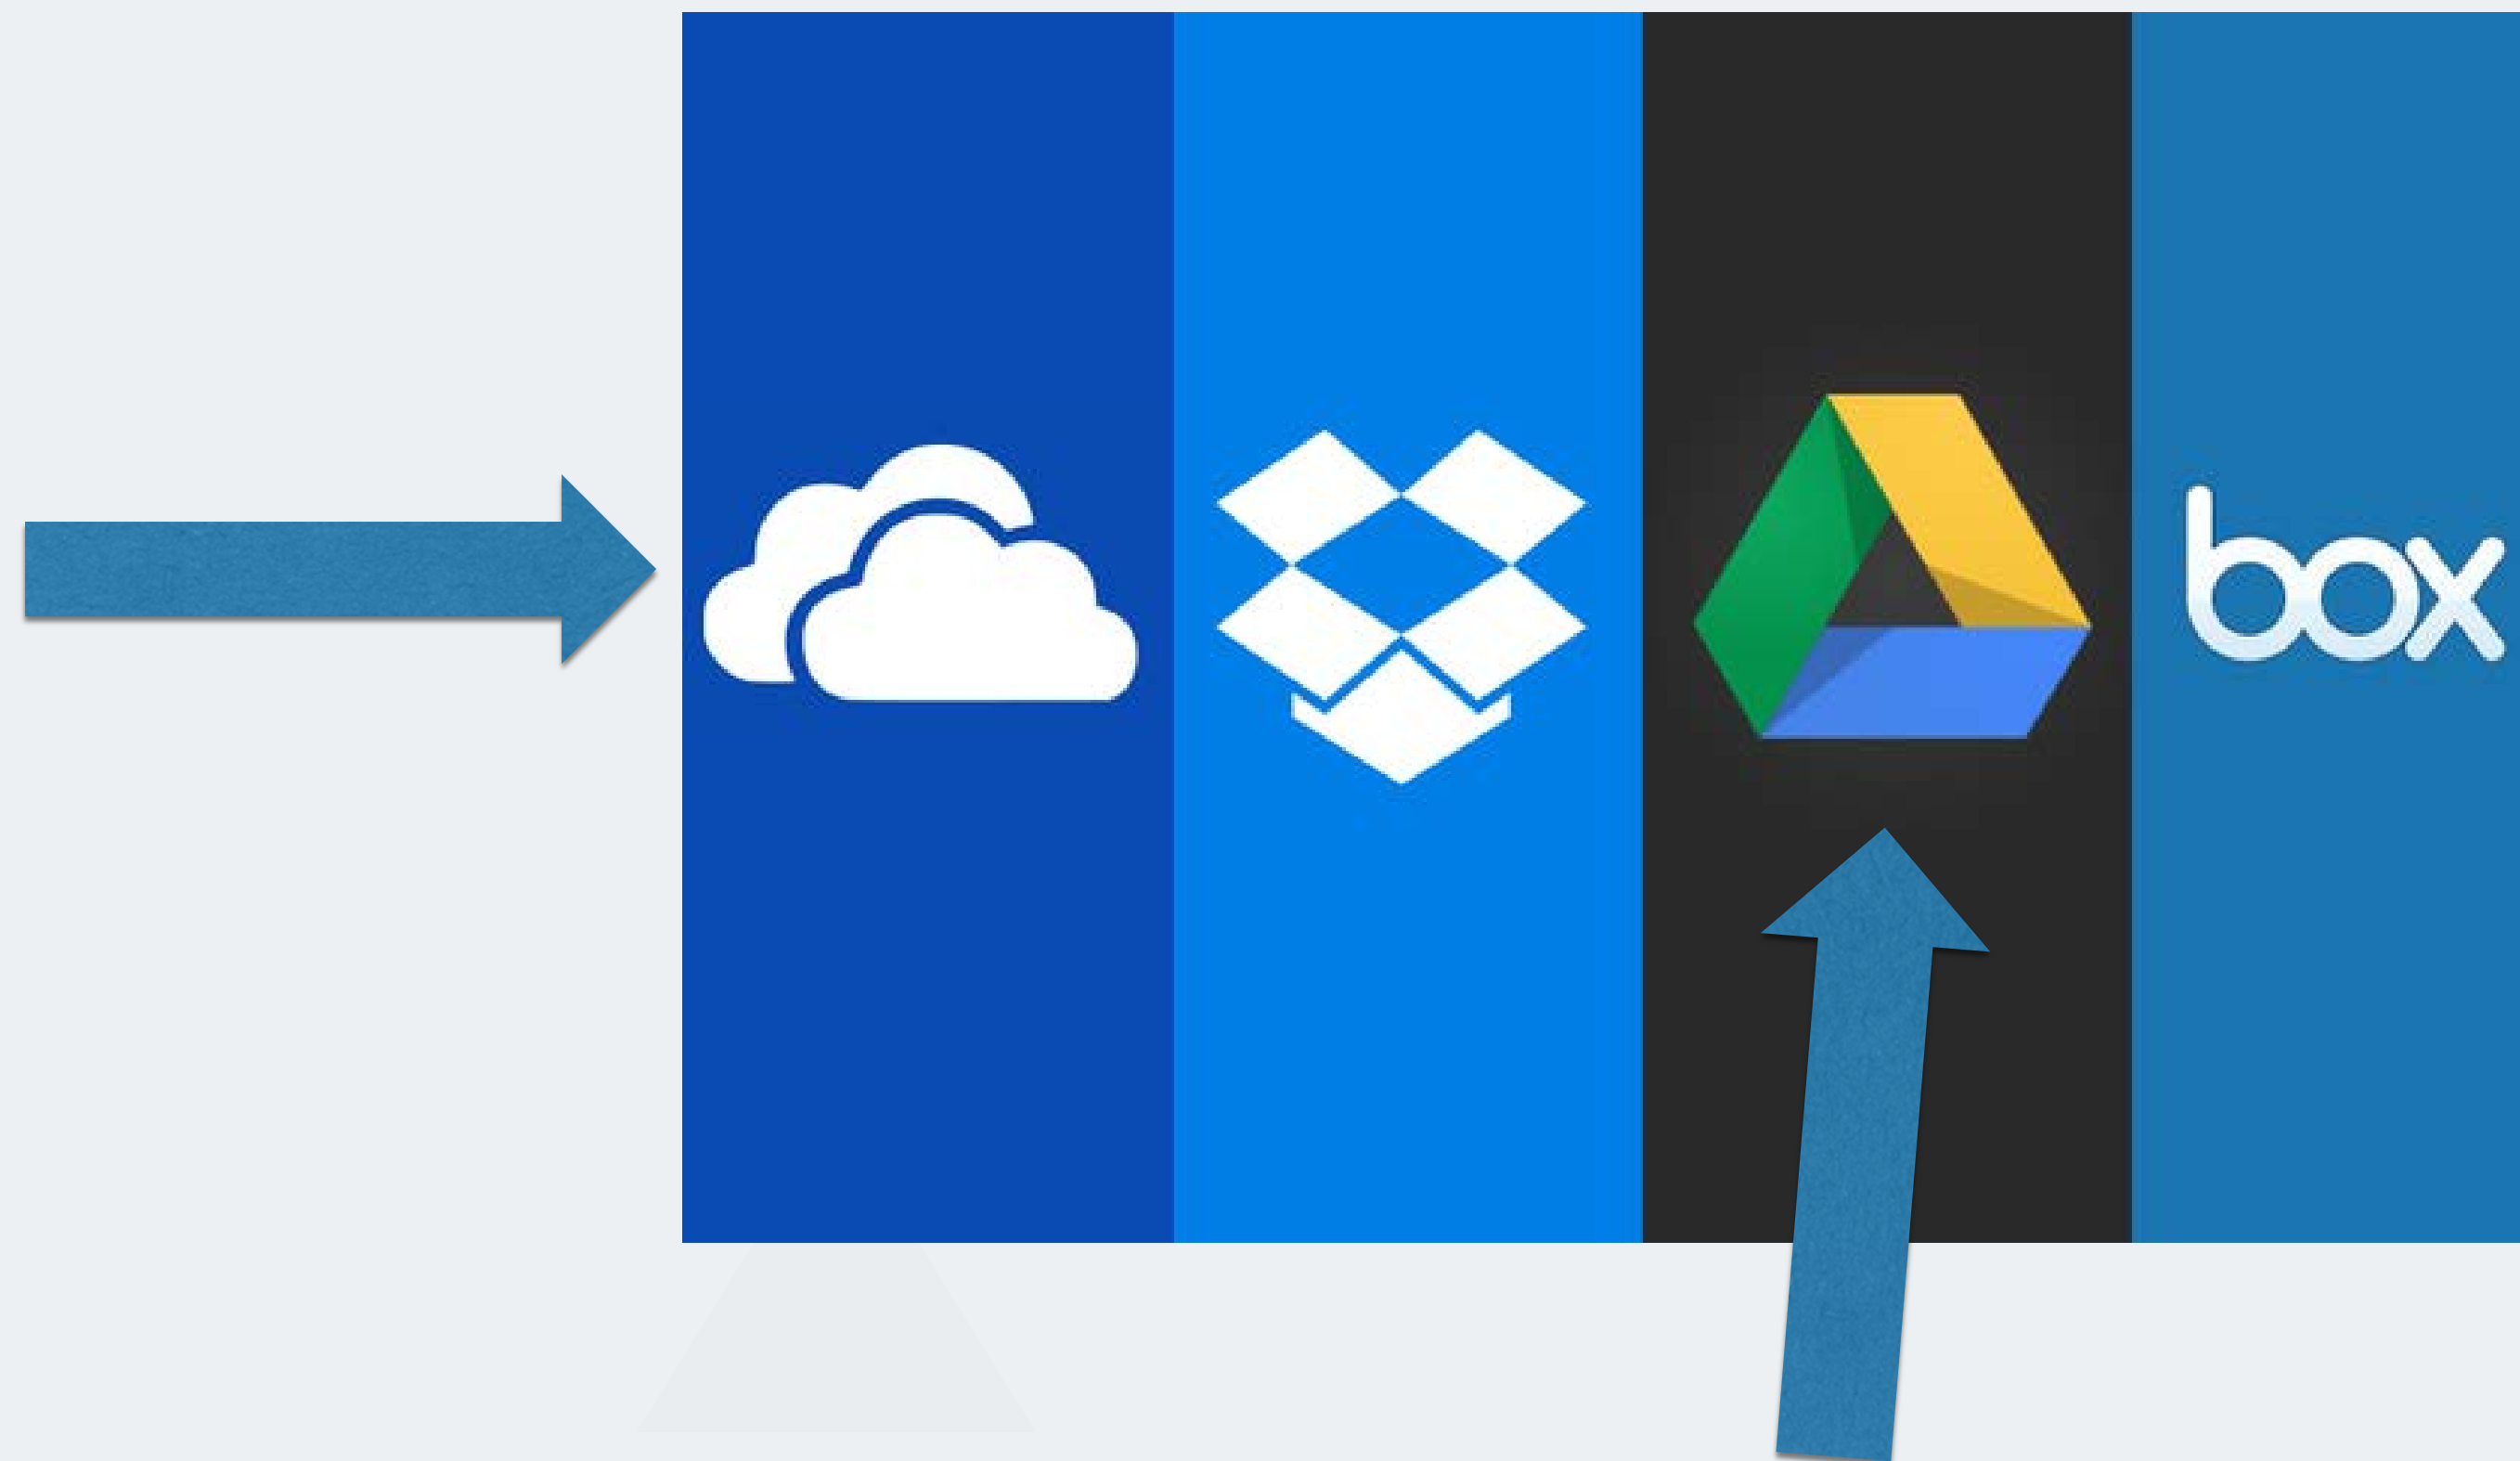

The Cloud

Physical backups everywhere.

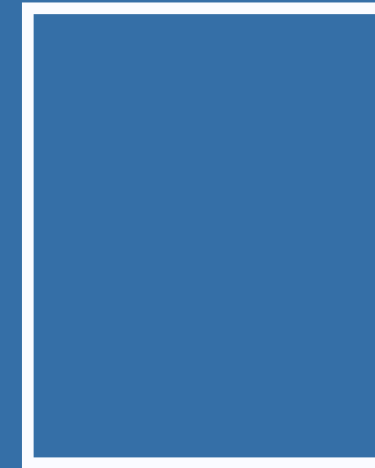

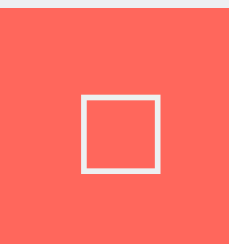

Which Cloud Storage Is Cheapest? How Prices For Google Drive, Dropbox, iCloud, and OneDrive Compare

Smart Phones

Which one is best?

Smart Phones

Which one do you like? What is the best?

● Social Media

● Email

● Phone Use / Work

● Web / App / Games

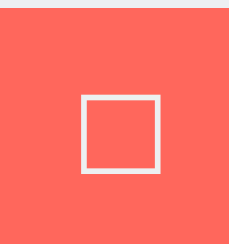

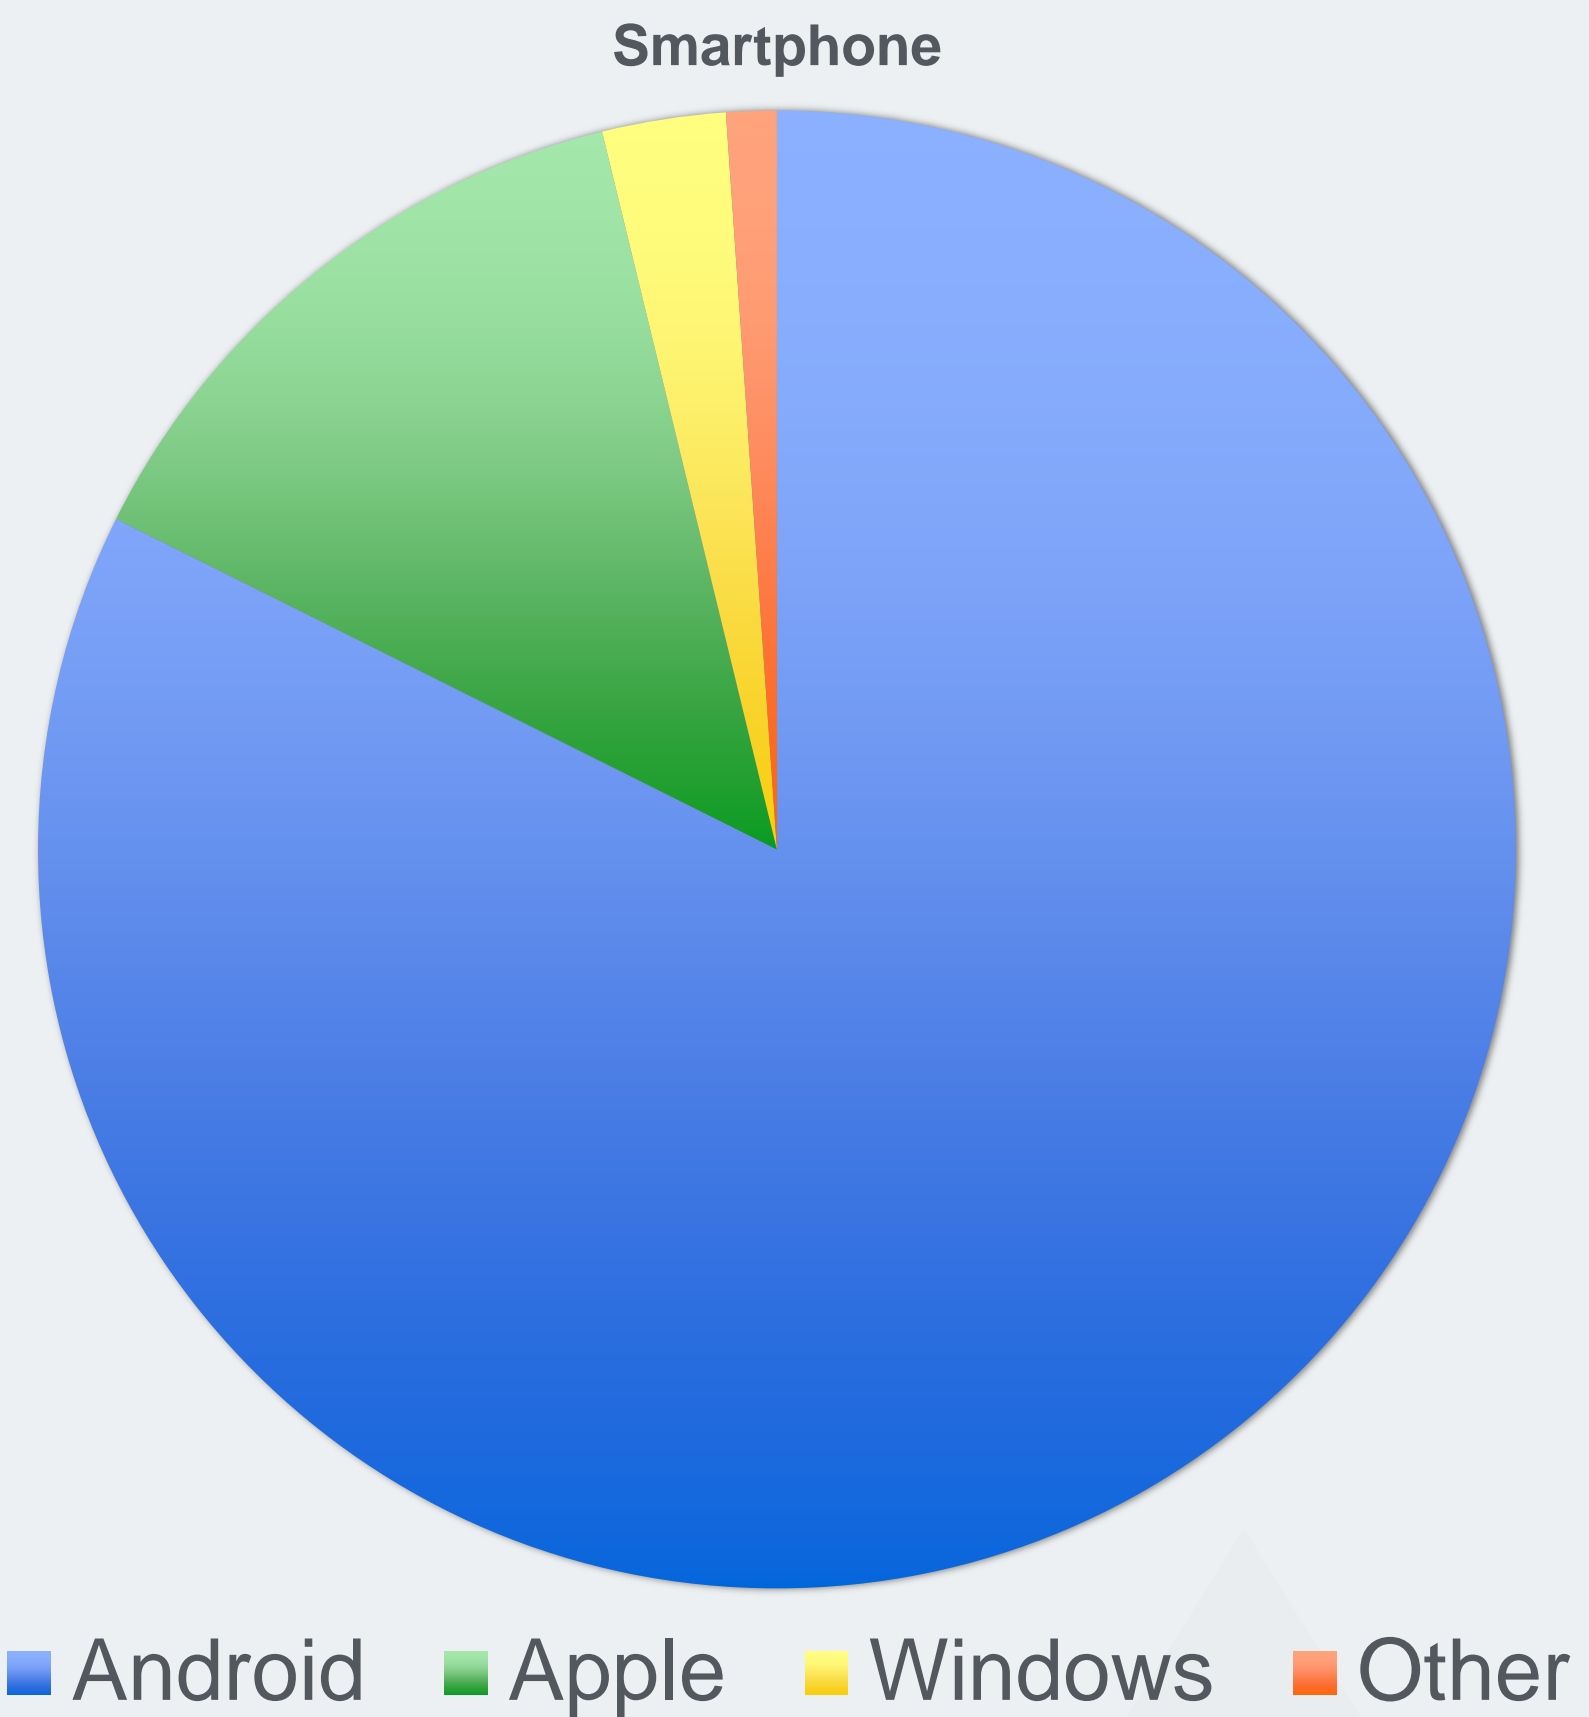

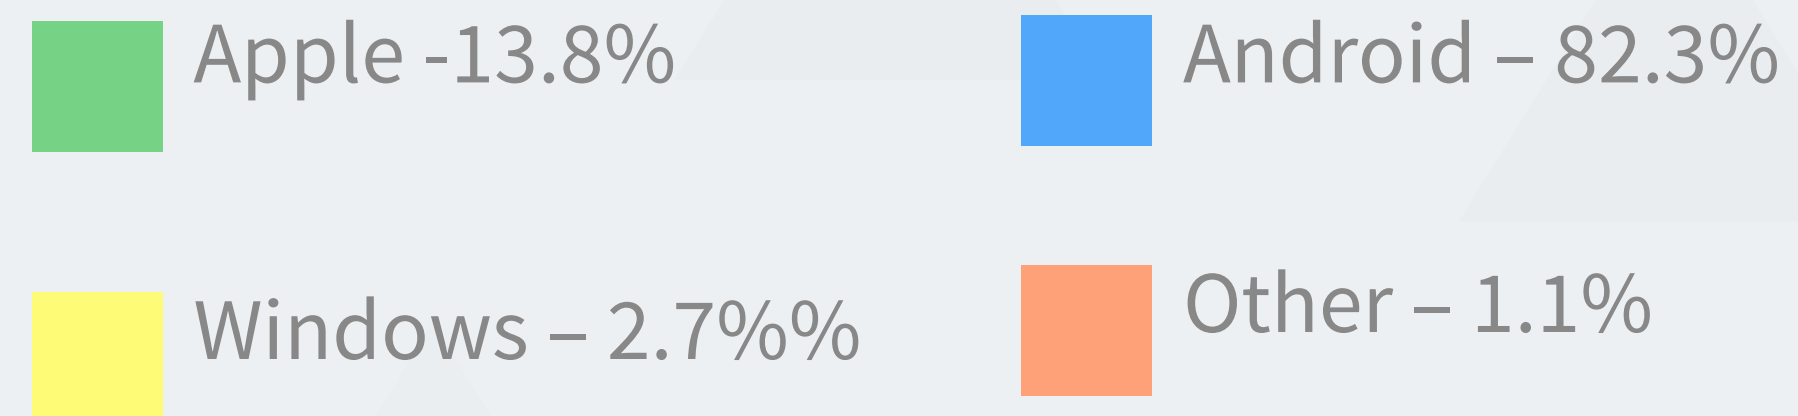

Chart Analysis

Lorem ipsum dolor sit amet, consectetur.

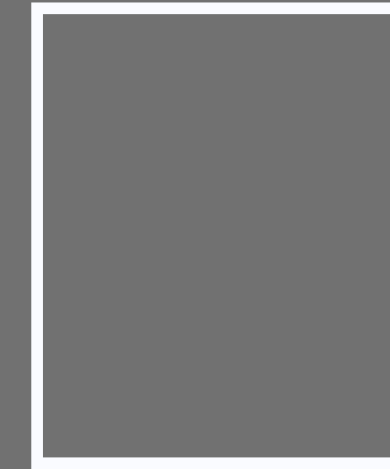

And the Winner is?

If you can believe this, the Android is the top selling phone on the market, according to Statistics for 2014.

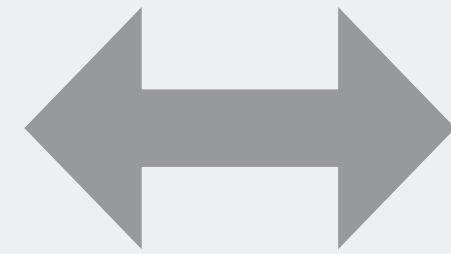

Online backups?

Which one works?

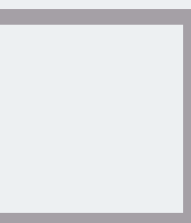

Online Backups

Cloud Storage

Online Backups

Online Backups

Safe, secure and cost effective.

The Options

Crash Plan

Crash Plan takes the convenience of storing things on your home computer and has turned it into something similar, although without the file and storage limitations that you may be facing. It also takes away the human error aspect, since it is all backed up automatically on whatever schedule you enter in.

Carbonite

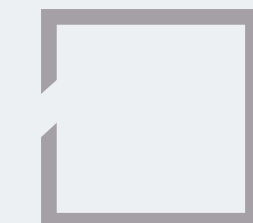

Carbonite is an ideal tool for any office environment, and many families have found it to be helpful in maintaining system speed. It provides easy file sharing, and can be accessed from a plethora of computers at any given time. You can also download the apps for Carbonite to your iPod Touch, iPad, iPhone, or even Android and Blackberry device for free access while you are out and about. There is no extra fee for using this service - mobile; just login to your account as you would on a computer.

Mosey

Mozy is a one-stop online storage company that will offer you all of the greatest features in one easy-to-use program. Their support team is always available to help if you run into any problems or questions, and there are easy restore methods that can be used in the rare case that it is needed.

Sugar Sync

Through folder and file sharing, you can collaborate with family, friends and colleagues on files of any size, or easily upload photos and music to social media sites. SugarSync provides the most powerful and flexible solution to managing your digital life, letting you share and sync data, documents, photos, movies, music and more across any of your devices, with an unbeatably broad range of native apps for any mobile device.

thanks for coming!

See you next year
