Forgot Your Password?

It is so frustrating to try to remember all our passwords. You might be one of the few organized people who keeps a running list of passwords, but that doesn't work if you are away from that list and need to get on that website. Would you like to never be confronted with those two words, "Forgot Password," ever again?

Kenneth Tubaugh will be sharing with us his solution to this problem. He has been using one passwords manager for several years now and will talk in depth about this one in particular. He will also share information about other ones as well. He will explain what you need to know when making a choice about using a specific program. Also, he will cover what is a strong password and why a long computer generated one may not be the most secure. He will also talk about the pros and cons of using search engines to save password.

If you have ever complained about not knowing one of your passwords, then you need to be at this Tech Night. You will be able to solve one of life's little (maybe not so little) annoyances. CKCS

President's Comments

By Brooke Thomas
president@ckcs.org

New CKCS Board

Elections occurred last month and we have the officers and board of directors ready for the next year. It should be an exciting new year. We will be working on developing new class offerings, new SIG's, upgrading the streaming hardware and software, and working in collaboration with other agencies like the Osher Lifelong Learning Institute.

Most of the faces on the board this year are familiar. The one exception is Pennie Redmond, pictured at left. She served on the board for one term in the past and is joining the board for a two-year term. Her work experience of being a teacher and later as a media specialist, will bring another dimension to the board.

iPad Workshop

The summer classes began last month, but the summer workshop won't be until the second week of July. That three-hour workshop, Secrets of the iPad, will be held Wednesday, July 12, 1 p.m. to 4 p.m. In this workshop you will learn key information about many preinstalled apps on your iPad. Important functions in settings, how to arrange, nest, download and delete apps, sending email and texts will be covered. Taking better photos, making folders and sending them will be demonstrated.

If you are interested in getting the most out of your iPad, be sure to call the office to register. The phone number is (859) 373-1000. The cost is $30 for non-members. Members get a 20 percent discount and pay $24.

Take a Picture and Post it

Next time you are at CKCS, take a picture of what's going on and post it on your Facebook page. Let your friends know what they are missing. Invite them to one of our SIGs or to Tech Night so they can see what we have to offer.

Kroger and Amazon Smile

Choose CKCS as your charity of choice with Kroger and Amazon Smile. Each time you purchase something (that is "eligible") Kroger or Amazon will donate a percentage of what you spend to CKCS. It's easy to do. If you need help, just ask a member to assist you with the process. CKCS

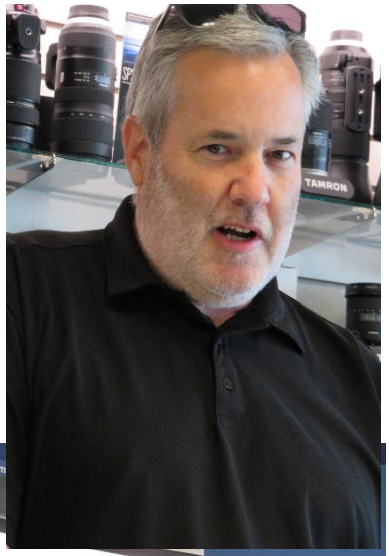
Photography SIG visited Murphy's Camera store in June

The June Digital Photography Special Interest Group was held at Murphy's Camera on Winchester Road. Nearly 30 members attended to hear Don Baker, in photo at left, address some of the new cameras and lenses that are on the market.



Baker invited David Coyle of **Team Coyle Photography**, photo at right, to show prints of his work and talk about how he took them.

David spent many years in sports photography at UK and now is working on his own. Some of his specialties are shots from the Red River Gorge and from Colorado. He also spends a lot of time shooting at Keeneland and other equine sites. He showed many of his stunning pictures and talked about how he achieved his results. Readers can check out some of his work at www.teamcoyle.com.

Monthly photo contest for June postponed

The photo contest normally held at each Digital Photography SIG meeting, was not conducted in June at Murphy's Camera store since the CKCS projector was not available. Joe Dietz, SIG leader, announced the June contest, on the category of "close-ups," will be rescheduled on an occasion in August or later. Check the August newsletter for more information. CKCS

CKCS leadership for 2017-18 elected at annual picnic

CKCS vice president Joe Dietz, standing center, welcomed attendees and made announcements at the start of the business meeting on June 12. The meeting was held at Lexington's Shillito Park. Photo by Jerry Markussen

Three things happen each year at the annual CKCS picnic. Lots of good food is consumed and our members get to visit with one another. The third thing, the primary purpose of the gathering, is to elect four officers and five directors to lead CKCS for the fiscal year starting July 1.

This year there was only one new candidate while the rest were nominated for reelection. Pennie Redmond, a retired Fayette County public school teacher, was elected to one of the five positions available. Four directors who were seeking reelection and were successful, included Janet Cartmell, Eugene Potter, Bob Brown and Larry Mitchum. Directors are elected for a two-year tenure starting July 1.

All four of the top officers were reelected: Brooke Thomas, president; Joe Dietz, vice-president; Larry Trivette, secretary; and Jim McCormick, treasurer. Officers are elected for a one-year tenure.

The election was conducted by the nominations chair Mike Seiler. Dietz, the vice-president, presided over the meeting because the society president was traveling in Arizona. CKCS

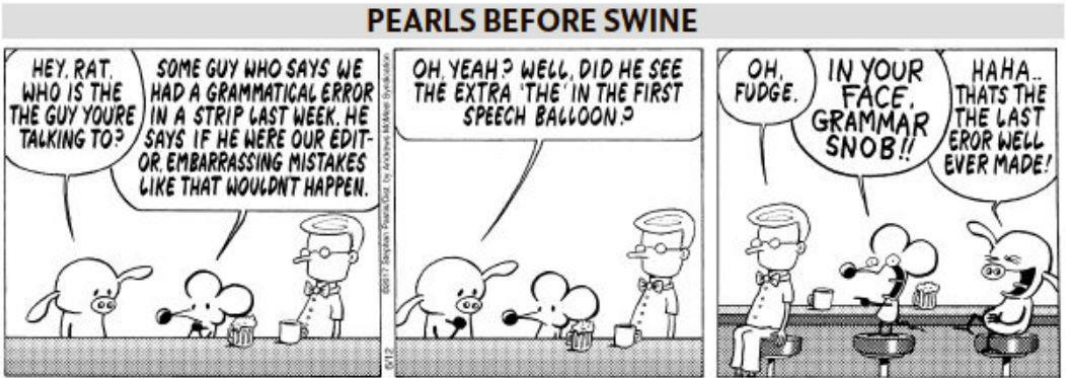
Your newsletter proofreaders are important!

By Jerry Heaton, CKCS newsletter editor

Each month, several of our members and friends volunteer to proofread each issue of this newsletter before it goes online. Two comic strips that appeared in the *Lexington Herald-Leader* in June, reminded me I should acknowledge the dedicated work of our proofreaders.

The comics strips, which gave me a good laugh, both appeared in the *Lexington Herald-Leader* and is one of my favorites to read every day.



The names of our proofreaders are listed in the proofreaders' section on page 2 of each issue. As the newsletter editor, I am very aware how important they are.

Fortunately, we have a talented group with a variety of skills and backgrounds. Among them is (1) a language arts teacher at Lexington Traditional Magnet School who retired after 34 years on the job, (2) a teacher at Henry Clay High School for 32 years who simultaneously taught night classes at UK during the spring and fall sessions for 25 of those years, and is an expert on computer maintenance. (3) We have a talented newspaper reporter from Richmond who is also a professional photographer who makes sure we follow the Associated Press standards for proofreading as he checks our work. (4) Another is a 30-year veteran teaching English and French at Lafayette High School and an Ohio school. (5) One individual mainly checks all links in the paper to see that they work properly. (6) We also are proud to have a retired college professor with a doctorate degree who taught in universities in Kentucky, Illinois and Tennessee. And we have others who didn't share their biographies.

As the newsletter editor, I am so grateful for our proofreaders, as they traditionally catch dozens of grammar, spelling, formatting and other errors that I and other contributors make. I use their suggestions and corrections to improve the content of each issue you view online.

Even though they do a great work, we usually leave two or three errors in each newsletter because we know there are always a few readers who get great joy finding errors in what we publish. ☺ CKCS

News to use

You can tell it is summertime – things slow down

The CKCS office takes a Supervisors' Summer Break

Our dedicated supervisors get some time off each summer. This year the office will be closed from Monday, July 31, to Friday, August 11. Although no one is officially on duty, a manager checks for and responds to phone messages during this period. Messages left are usually responded to within 24 hours.

Three of our SIGS will not meet this month.

1. The **Word Processing SIG** leader Larry Trivette has cancelled his monthly Word Processing SIG meeting on July 4 due to the holiday.

2. The **Windows 10 SIG** meeting will not meet this month as SIG leader Mike Seiler will also be conducting four hours of instruction on two Windows 10 classes that same week.

   Mike requests that if you want your name on his mailing list and have not already sent him an email, please email your name (first and last) and your email address to: w10sig.ckcs@gmail.com.

3. The **Mac and iPad SIG** will not meet this month as SIG leader Kurt Jefferson is teaching at the Aviation Museum this month.

HEY COME ON OUT

Chat about tech subjects

It is fun and you will learn something too !

When? The first Thursday each month at 1:30 p.m.
Where? CKCS 160 Moore Drive

The Tech Chat group satisfies a fundamental desire in many people, especially CKCS members. It is a monthly meeting where people just sit around on comfortable chairs and talk about technology. There is very little work involved.

Tech Chat meets on the first Thursday of every month at 1:30 p.m. It is also streamed live on our Nest Cam service (see the CKCS Meeting Calendar webpage for a link).

We prepare some topics to talk about and try to launch conversations. We do not try to keep the conversations on topic – much of the fun is in the exploration.

We welcome anyone who wants to bring up topics. Please try to find a web-based reference (preferably with photos or videos) that illustrate your topic.

Some subjects we have talked about in the past are new computer and telephone products, the massive Windows 10 upgrade process, the internet of things, the amazing worldwide implementation of wind and solar power generation, robots and artificial intelligence, and many more.

Our goal for each meeting is to make ourselves a bit more knowledgeable by demystifying technology and science.

Photo Coffee SIG had a guest speaker in June

On Thursday, June 1, the Photo Coffee Special Interest Group had a different type of session in which they invited a guest speaker. **Erin Kerr** conducted a question and answer presentation on Photo Shop Elements. Members of this group had been seeking more information about the Photo Shop program and Erin has been using that software for more than eight years. During the hour and a half, she fielded questions about the various aspects of the program and demonstrated the program's features.

Erin is the daughter of one of our members, Arleigh Kerr. Erin is studying Interior Design and just returned from Denmark where she was learning about furniture design.

The Photo Coffee group meets each Thursday at 9 a.m. Rather than an invited speaker, the sessions are normally free-wheeling discussion, mostly about photography, but all computer topics are fair game. They start at 9 but with no set schedule, attendees leave when ready.

Most bring their own coffee, but some use the K-Cup machine offered by CKCS.

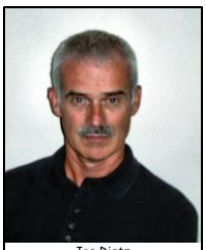
Digital Photography Special Interest Group

July 25, 2017
7 p.m.

2017 Annual "Hall-of-Fame"



Joe Dietz
Digital Photography
SIG Leader

July brings about our annual "Hall-of-Fame" photo contest.

This year we have another interesting list of topics for our annual photo contest. Based on your recommendations, the three topics for this year are: (1) People at Work, (2) Church Windows and (3) Back Alleys. The contest will be at the July 25, 2017 SIG meeting at CKCS. Let your imagination be your guide.

This year we are again asking members to leave their pictures with us! We will display the winners in the main room and use several others to decorate the main room and the front windows.

In order to submit images:

- Be a member of CKCS
- No photos that have been submitted in previous contests at CKCS can be used.
- Each member can submit a maximum of three pictures. They can all be in one category or spread among the three categories.
- Picture and matte or digital frame (if used) can be no larger than 8 ½ by 11 inches.
- No Foam Board (they are hard to hang)
- NO hard frames – digital frames are ok.
- With each picture be sure to include on the back of the picture, your name, your email address, the name of the picture, and the category you want the picture to be in. If no category is listed, I get to pick which category. (I know someone will submit a picture of **someone working** in a **back alley** underneath a **church window** and what category will that be? Better you choose than me!)

Pictures must be placed in my CKCS **Photo Contest** mailbox no later than **noon** on Monday, July 24.

Each attendee will be able to vote for **Best-of-Show** and on the top three pictures of each category. Awards will be given for "**Best of Show**" and first, second and third place for each category.

Thanks for all your support! See you at 7 p.m. at CKCS on July 25.

And don't forget to bring a snack to share! CKCS

Computer tips from CKCS members and friends

Members are invited to share their favorite computer tips with other members. They may involve your use of computers, tablets or phones. Please use this opportunity to help one another on these pages. Be brief but complete. Send your tip to Newsletter@ckcs.org – please include your name and phone number should the editor need to contact you.

Computer Tip: Six computer tricks

1. CHANGE TEXT CASE WITHOUT RETYPING IN MICROSOFT WORD.
HIGHLIGHT AND DO SHIFT + F3

2. SHARE A SCREEN SHOT WITHOUT SAVING IT.
USE THE SNIPPING TOOL.

3. SAVE INK AND PRINT FASTER.
WHEN PRINTING TEXT DOCUMENTS, CHANGE THE TEXT COLOR TO GREY.
THIS WAY, YOU'LL BE SPEEDING UP THE PRINTING TIME AND SAVING BLACK INK WITHOUT ALTERING THE QUALITY.

4. MINIMIZE ALL WINDOWS EXCEPT THE ACTIVE ONE.
JUST GRAB AND SHAKE THE ACTIVE ONE.

5. ENTER NEW WEB PAGES WITH EASE.
HIT **F-6** TO HIGHLIGHT THE ADDRESS BAR.

FOR EVEN MORE EASE, YOU CAN TYPE IN THE NAME OF THE WEBSITE WITHOUT 'WWW' AND '.COM' AND DO **CONTROL ENTER**

6. HIGHLIGHTING TIPS
DO CONTROL + A TO HIGHLIGHT THE WHOLE PAGE.
OR CLICK ONCE ON THE START POINT AND **SHIFT + CLICK** ON THE END POINT.

Furnished by Joe Isaac

Computer Tip: Two handy shortcuts

CTRL + SHIFT + T = Reopens the last tab you closed in your browser.
CTRL + D = Bookmarks the page you are viewing.

Furnished by Larry Mitchum

Computer Tip: Typing symbols in word processing from Joe Dietz

Did you ever want to use the symbol for “cents” or “degrees” and can’t find it on your keyboard? Well, it is there but fairly well hidden. To type the symbol for degrees, hold down the **Alt** key and then type **248** and you will get it - **°.**
To type the symbol for cents hold down the **Alt** key and type **155** = ¢.
For a complete list of these codes, go to www.alt-codes.net/ . This works on many word processing programs.

Furnished by Joe Dietz CKCS

A few Funny Pages / Useful Information

This was printed in a Texas newspaper

The oldest cowboy in Texas died this week at the age of 106. On his birthday he was asked his secret to longevity and he said that for the past 50 years he has sprinkled a little gunpowder on this cereal each morning. He left behind 8 children, 21 grandchildren and 32 great-grandchildren and a 15-foot hole in the crematorium.

Where Eagles Dare

French military using winged warriors to hunt down rogue drones

Following incidents of drones flying over the presidential palace and restricted military sites – along with the deadly 2015 Paris terror attacks – the French air force has trained four golden eagles to intercept and destroy the rogue aircraft. Aptly named d'Artagnan, Athos, Porthos and Aramis – an homage to Alexandre Dumas' "The Three Musketeers" – the four birds of prey have been honing their attack skills at the Mont-de-Marsan in southwestern France since mid-2016.

“A drone means food for these birds,” Gerald Machoukow, the military base's falconer, told FRANCE 24. “Now they automatically go after them.”

The use of hunting birds – normally falcons and northern goshawks – by militaries around the globe is common practice in the fight to scare other critters away from runways and so cut the risk of accidents during takeoff or landing. But it wasn’t until 2015 when the Dutch started using bald eagles to intercept drones that other militaries started to see the benefit of these winged warriors.

The French bred the four golden eagles – three males and one female -- using artificial insemination since eagles are a protected species and harvesting wild eggs is strictly forbidden They chose the golden eagle because of the birds hooked beak and sharp eyesight.

Also weighing in around 11 pounds, the birds are in a similar weight class as the drones they’re sent to destroy and clocking in at a top air speed of 50 miles per hour with the capability of spotting its target from over a mile away, the eagles are deft hunters.

To protect the eagles from drone blades and any explosive device that might be attached to them, the French military designed mittens of leather and Kevlar, an anti-blast material, to protect the birds’ talons.

A golden eagle carries a flying drone away during a military training exercise at Mont-de-Marsan French Air Force base, southwestern France, February 10, 2017. REUTERS

The new Mercedes

A retired older couple returned to a Mercedes dealership where the salesman has just sold the car they had been interested in to a beautiful, leggy, busty blonde in a mini skirt and a halter top. The old man was visibly upset. He spoke to the salesman sharply, "Young man, I thought you said you would hold that car till we raised the $95,000 asking price. Yet I just overheard you closed the deal for $75,000 to the lovely young lady there. And if I remember right, you had insisted there was no way you could discount this model." The salesman took a deep breath, cleared his throat and reached for a large glass of water. "Well, what can I tell you? She had the cash ready, didn't need any financing help, and, Sir, just look at her, how could I resist?", replied the grinning salesman sheepishly.

Just then the young woman approached the senior couple and gave the car keys to the old man.

“There you go," she said. "I told you I could get that idiot to lower the price. See you later, Dad, Happy Father's Day."

Once again.... don't mess with seniors.

Furnished by Carl Peter

Some things all true southerners clearly understand

A possum is a flat animal that sleeps in the middle of the road.

There are 5,000 types of snakes and 4,998 of them live in the South.

There are 10,000 types of spiders All 10,000 of them live in the South, plus a couple no one's seen before.

If it grows, it'll stick ya. If it crawls, it'll bite cha.

Onced and Twiced are words

It is not a shopping cart, it is a buggy!

Jawl-P? means, Did you all go to the bathroom?

People actually grow, eat and like okra.

Fixinto is one word. It means I'm going to do that.

There is no such thing as lunch. There is only dinner and then there's supper.

Iced tea is appropriate for all meals and you start drinking it when you're two. We do like a little tea with our sugar. It is referred to as the wine of the South.

Backwards and forwards means I know everything about you.

The word jeet is actually a question meaning, 'Did you eat?'

You don't have to wear a watch, because it doesn't matter what time it is, you work until you're done or it's too dark to see.

You don't PUSH buttons, you MASH em.

Ya'll is singular. All ya'll is plural.

All the festivals across the state are named after a fruit, vegetable, grain, insect, or animal.

You carry jumper cables in your car – for your OWN car.

You only own five spices: salt, pepper, mustard, Tabasco and ketchup.

The local papers cover national and international news on one page, but require six pages for local high school sports, the motor sports, and gossip.

Everyone you meet is a Honey, Sugar, Miss(first name) or Mr.(first name)

You think that the first day of deer season is a national holiday.

You know what a hissy fit is.

Fried catfish is the other white meat.

We don't need no dang Driver's Ed. If our mama says we can drive, we can drive!

You understand these jokes and forward them to your Southern friends and those who just wish they were from the SOUTH.

AND one more:
Why did the chicken cross the road? To show that stupid possum that it CAN be done!

We are at 373 Virginia Ave., near So. Broadway and the University of Kentucky

FREDDY's TOP TIPS TO IMPROVE YOUR COMPUTER PERFORMANCE AND SECURITY:

» **Upgrade your hard drive to a SSD** (Solid State Drive): now 120GB and 250GB SSD drives cost under $100.00; the SSD positive impact on the performance of a computer is simply unbelievable.

» **Do Image Backups of your computer:** of the whole computer (OS, programs, settings, everything) and **no only your documents and personal files**; use Acronis Backup Software to do monthly (and weekly) completely unattended image backups of your computer to a second hard drive (a USB connected one but preferable an internal one).

» **Use MalwareBytes software to protect against malware:** and better yet use the Premium version (only $15 per computer per year);

» **Windows 10 is GOOD and free** (for existing Windows 7 and Windows 8 computers)! Welcome back to the Windows 7 like interface that most everybody feel at home with. Please be also aware that Windows 10 expand the amount of information obtained by Microsoft from your computer usage (more on it can be read at many places online including http://www.polygon.com/2015/7/31/9075531/windows-10-privacy-how-to).

» **Make sure that you are visiting the website that you really want to visit**; there are many misleading sites that try to trick you into believing that they are the intended legit site ... but they are not! Be careful with the spelling of the name of a site; be careful with the first "findings" of the search engines; most times they are no findings but (many times deceptive) advertising.

» If somebody call you about the "problems of your computer" **simply hang off**; they are not legitimate people so do not even waste your time even threatening them.

KyTrade IS A CORPORATE PARTNER OF CKCS

CKCS List of Special Interest Groups

Each month the Central Kentucky Computer Society offers eleven Special Interest Groups (SIGs) which may be attended by members and their guests. Visitors are cordially invited to become active CKCS members. Starting times of SIGS are as indicated in the listing. Always check the "Monthly Schedule" and the "Newsletter" link on the CKCS home page for any schedule changes www.ckcs.org

ANDROID SIG

Meets monthly on the third Tuesday at 7 p.m. – Leaders are Boone Baldwin, Bob Brown, and Kenneth Tubaugh

The Android SIG is dedicated to covering the world's most widely used mobile operating system, Android's abundant variations, the hardware that runs it, and all things concerning Google's parent company, Alphabet Inc. Our contributors include technology enthusiasts and professionals in the industry who have come together under a united passion: a love of mobile technology. This group is open to anyone interested in discussing the Android ecosystem, contributing tips and tricks, promoting apps, sharing experiences, and exploring Alphabet Inc. related news.

DATABASE SIG

Meets monthly on the fourth Monday at 7 p.m. – Leader Garland Smith

DIGITAL PHOTOGRAPHY SIG

Meets monthly on the fourth Tuesday at 7 p.m. – Leader Joe Dietz

The Digital Photography Special Interest Group is a forum to provide and share information about digital imaging. The SIG frequently has guest speakers to cover a wide range of topics that are related to digital imaging. Some of our past topics have been on digital archiving (AKA Backup), getting the best out of your point and shoot camera, effective lighting when taking pictures, restoring old photos and many others. The goal of this SIG is to help attendees to better understand digital imaging, learning how to get the best out of their cameras and how to improve their images with digital imaging software such as Corel's Paint Shop Pro, Photoshop CS/Elements, Gimp or other program. Each meeting starts with a photo contest with a variety of different categories.

DR. FIXIT SIG

Meets monthly on the first Saturday at 10 a.m. –Leaders are Bob Brown, Ben Rice, James Osborne, and Mike Seiler.

Bring in your sick computer for evaluation. Our 'experts' will diagnose the problem and if possible make simple repairs. All you need to bring is the CPU. Our leaders will use a mouse and monitor we have on hand.

iHELP SIG

Meets monthly on the first Saturday at 10 a.m. in the classroom. iHelp leaders Jeannine Essig, Lilly Crawley, Janet Cartmell, Kurt Jefferson, Joe Settles, Brooke Thomas and Joe Dietz

Bring your questions about Apple iPhone, tablets and computers. Our iHelpers offer one-on-one advice and suggestions. It is best if you bring your Apple devices, fully charged when you come.

MAC AND iPAD SIG

Meets monthly on the second Thursday at 7 p.m. – Leader Kurt Jefferson

Attendees are encouraged to bring their Mac laptops and iPad tablets to experience firsthand the tips provided at each meeting. Whether you're a beginner to the Mac or iPad, of you've been using both devices for several The Mac and iPad SIG tackles issues to help make both Apple's Mac computers and its iPad tablet easier to use and more enjoyable. We deal with a variety of topics ranging from Mac OS X (pronounced "10") to iOS, the operating system running Apple's iPad. We share tips at every meeting and provide insights to empower users to get more out of their Macs and their iPads. Users years, you'll walk away with plenty of tips, tricks, and advice to make your computing experience more enjoyable.

MICROSOFT ACCESS SIG

Meets monthly on the third Thursday at 7 p.m. – Leader Stuart Zahalka

TECH CHAT SIG

Meets monthly on the first Thursday at 1:30 p.m. Leader Bob Brown

Keeping up with personal and home technology is getting harder. New products and new internet services are coming rapid fire. The purpose of the Tech Chat Group is to talk about technology as it happens. We are trying to stay aware of new ideas and understand what impact they will have on us.

WINDOWS SIG

Meets monthly on the second Tuesday at 7 p.m. – Leader Mike Seiler

Topics covered may be: Windows 10, Cortana, EDGE, Alarms & Clock, PHOTOS, Google Maps, Spotify, Settings, Mail, Control Panel, System Restore, Disk Cleanup, Desktop, Taskbar.

WORD PROCESSING SIG

Meets monthly on the first Tuesday at 1:30 p.m. Leader Larry Trivette

The Word Processing SIG starts with questions from classmates where the SIG leader and all attending help provide solutions and answers. In fact, many of the topics presented during each session come from questions received by email during the month. Topics are presented so that new as well as advanced computer users will benefit by attending. This workshop uses several Microsoft Word versions during the SIG.

UNIX / LINUX SIG

Meets monthly on the fourth Thursday at 7 p.m. – Leader Lewis Gardner

The Linux SIG handles a wide range of technical topics. Linux is based on Unix which is the granddaddy of modern networking. We spend a considerable amount of time on servers, networks, routers, access points and general network configuration. These operating systems are at the heart of many devices in our increasingly connected world. Come out and we will try to get your questions answered, your problems troubleshot or devices configured.
