**TECH NIGHT, MONDAY, AUGUST 14, 7 p.m.**

## Genealogy- Tips to research your family tree

Denise Shanks is back for Tech Night this month to update us on what is available to search your family roots and to bring us new tools and technology.

Denise Shanks, librarian at the Lexington Public Library, has worked there since 1994 and received her MLS in 1998 from UK. For the past 17 years, she has worked in the Kentucky Room and has spent much of that time working with family researchers and developing programs and finding aids for genealogists. She began leading classes about genealogy research about seven years ago.

She will be showing us what *Ancestry Library Edition (LE)* has to offer and how to use it. You will be amazed at how much information is available. This particular subscription has to be accessed at the library.

She will also spend time showing other online genealogy sources and demonstrate researching using these sources. With all they offer, you can begin some research on your own from your home computer. She will be sharing some of genealogists' favorite websites. Ancestry staff and volunteers are adding resources all the time to this collection of records. She will be able to demonstrate a live search of "HeritageQuest" and "Find-a-Grave".

Everyone from beginners to the advanced genealogy researchers will learn something this night that will help them track their family tree.

# President's Comments

By Brooke Thomas  
[president@ckcs.org](mailto:president@ckcs.org)

## Lilly Crowley is retiring

Lilly Crowley is retiring from Central Kentucky Computer Society. She made it official this month.

If she weren't moving so far away, I'm sure she would still be helping at CKCS. She will be sorely missed, but we wish her well in her new adventure.

Lilly became a member in 1997. She has performed many roles throughout the years. She was involved in developing many of the classes including the Greeting Card

Class, the Works Class, the iPhone and the iPad class. She has served as the office manager and volunteered as an office supervisor. She has always been willing to help with the annual picnics and holiday parties. When Central Kentucky Computer Society held the CompuLex shows in Heritage Hall, she was there helping. She also served as a director on the CKCS Board. For years she has been the one responsible for sending out the thank-you cards to people who make donations.

Not only did Lilly do all these things, but she willingly volunteered and took on these responsibilities with a smile and a great attitude. You could count on her to pitch in and help no matter the task.

It's individuals like Lilly Crowley that make CKCS successful. She has been the strength behind the scenes that few people see, but keeps the organization going. We wish her well and hope that she stops by to visit when she is in town!

# The Cloud and You

By Ken Goodman

Everybody who has a computer has heard all the hype about the **Cloud**. I thought I'd explain what it's all about and why it's important.

Let's start with what the cloud is. The cloud is the vast internet available to you through your web browser and web applications. Web applications are the apps that run online and not directly from your physical computer. Some examples of these applications include Google Docs, Google Sheets, Windows Modern Apps, etc. The evolution of the internet has come to include applications that use the internet as its source. When you run a cloud application, it gets its code from the web and opens a window on your Windows 10 desktop. These applications are different from traditional programs in that they are in a protected environment closed off from other parts of the environment.

This brings us to the second part of this article: why is using the cloud important? As explained above, by running your applications from the internet, your computer has built a virtual environment around the application and it makes it much harder for malware to attack your computer. This is the reason that Windows 10S was introduced by Microsoft. They are trying to build a much more secure environment for you to work. This is all well and good, but there are many applications that are not cloud based. Microsoft has offered software developers a tool that helps convert desktop applications to cloud apps.

Microsoft is currently working on its desktop office software (Office 365) to make it a full web app with all the functionality of the desktop applications. They project that this will be done by end of the year. Some think it may be early next year, but it will happen soon. These are very complex programs. There is already a version with less functionality available called Office Online.

In the future, many of us will have to make decisions as to if we want to run pure desktop applications that cannot run under Windows 10S at the sake of security. In today's environment, that can be very dangerous with the increase in malware we have been experiencing. 

The three logos shown on this page are One Drive, (top) Google Drive (middle) and iCloud drive (at bottom).

*Kenneth Goodman is a CKCS member who lives in Florida.  
He leads a weekly computer class in Fort Lauderdale.  
We are grateful for the articles he writes for this newsletter.*

## Digital Photography Special Interest Group

August 22, 2017

## KET Visits CKCS

Joe Dietz  
Digital Photography  
SIG Leader

Most of you have seen some of the wonderful work that KET has done. They have a great list of art, music, theatre, local events and much, much more. One of their staff photographers, Steve Shaffer, will make a presentation to CKCS at 7 p.m. on August 22, 2017. Steve has worked at KET for some 15 years and has a lot of experience in different aspects of photography. He will talk to us about some of his experiences at KET. Steve will be talking about skills one must possess in order to be successful in production and give some advice on getting a good shot for video production. Here are a couple of his videos from KET which you may wish to view.

<https://www.ket.org/episode/KVPRO+000064/>

<https://www.ket.org/episode/KVPRO+000067/>

From his **LinkedIn** page: “Staff photographer (still) migrating into video in 2009. Now producing, shooting, lighting and editing video is my primary responsibility, producing everything from 1 minute promotional pieces to 30-minute series episodes.”

“I began with image/promotional pieces and expanded to series segments for shows like Kentucky Life and Kentucky Collectibles. That work culminated in 2 Emmy nominations for 2015. In 2016, I produced, shot, directed and edited an episode of Kentucky Collectibles featuring country music star Vince Gill.”

A couple of his shots:

**The August photo contest is “Arches”.**

This topic can be interpreted in many ways so it will be fun to see what you submit! Get out and take some good shot and submit them to [joedietz@aol.com](mailto:joedietz@aol.com) no later than August 21.

This will be an extremely interesting evening. So come on out!

# News to use

## Three SIGs on vacation this month

The **Word SIG**, led by Larry Trivette on the first Tuesday each month, will not meet in August. The **Tech Chat SIG**, led by Bob Brown on the first Thursday each month will not meet in August. The **Windows 10 SIG**, led by Mike Seiler on the second Tuesday each month will not meet this month.

## CKCS Office Supervisors also on vacation

As is tradition, the volunteer office supervisors take some time off around this time each year. Their vacation started on July 31. They will be back on duty Monday, August 14. Although no one is officially on duty during the vacation period, a manager checks for and responds to left phone messages usually on the next business day.

## Photo contest make-up scheduled

Each month, the Digital Photography SIG traditionally conducts a photo contest. Due to meeting at a camera store in June, they were unable to conduct their June photo contest. The photos on the category "Close-ups," submitted for June, will be evaluated and voted on at the August 22 meeting.

## August is re-registration month for Kroger donations

Thanks to all CKCS members and supporters who signed up last year to have their Kroger donations sent to CKCS. The Kroger rebate to CKCS money provides us with a few extras that we would not have without another form of income.

This is a reminder that Kroger requires every participant in its Community Rewards program to re-register during the month of August. Doing so means that donations created beginning in September will continue to sent to CKCS.

The easiest way is to call 1-800-KROGERS and choose Option #3. The Kroger agent will take your information as necessary for the current year. The CKCS code is 11119, or just give them our name.

You can also get help at the CKCS office on or after August 14, (when the office supervisors return from vacation).

If you want to do this online, go to the Kroger webpage ([www.kroger.com](http://www.kroger.com)) and follow the instructions to register, the code number for CKCS is 11119 – you will need to know this at some point during the process.

Hurry and do it early in August so you don't forget it.

# Kurt Jefferson's June column is his last

After 21 years of writing a column for CKCS, Kurt Jefferson is easing off the accelerator and reverting to only leading his Mac and iPad SIG at 7 p.m. on the second Thursday of the month, occasionally teaching classes and assisting the Saturday "iHelp" sessions.

His column in June will be his last. When there was no column in July, several of our members wondered what happened, because Kurt never missed making valuable input to each CKCS newsletter.

Early on, his columns were limited to one page or less when CKCS had a hard-copy newsletter (Computer File) distributed by mail. Once we began an internet online publication in February 2009, Kurt was able to expand his column to cover much more of Apple's products and news.

Kurt first joined CKCS in October 1994 and has become an important contributor to the organization ever since. In addition to authoring his column, he has taught classes, led his SIG and once served on the board of directors. For 21 years he has written his column which once was called *The Mac Corner*, but more recently simply *Mac and iPad*.

Back in the early 90's, Kurt moved to Lexington where he worked as a news reporter/photographer for WLEX-TV (Channel 18). After working at the station for four years, he began working for the newly launched online division of the Lexington Herald Leader. Insiders at the paper called it New Media, but those visiting the web site called it Kentucky Connect. Eventually, the name changed to Kentucky.com. Kurt, along with co-workers, created the daily version of the online newspaper - transferring stories appearing in the paper edition to the web. Kurt also shot video, including post-game interviews with U.K. and University of Louisville basketball and football coaches. In those early internet days, he also videotaped game highlights and put links on the Herald Leader's web site so viewers could watch clips of the games that had just concluded.

The Aviation Museum of Kentucky, based at Blue Grass Airport, holds aviation camps for youth from 10-16 years old. For nearly a decade, during June and July, Kurt has taken a break from his SIG duties at CKCS to teach the aeronautics section of the camp to youth in Lexington, Louisville, Bowling Green, Pikeville and Hazard.

CKCS will be forever grateful to Kurt for his reporting about Apple's history and products and keeping us abreast of the latest news. We are also grateful that he will continue to lead his Mac and iPad SIG, plus occasional classes and iHelp sessions.

# TECH TALK

by Joe Isaac

[joeisaac1234@gmail.com](mailto:joeisaac1234@gmail.com)

## How to save a web site

I think you will love these !

### IN GOOGLE:

Reduce the size of the website page so you can see the desktop.

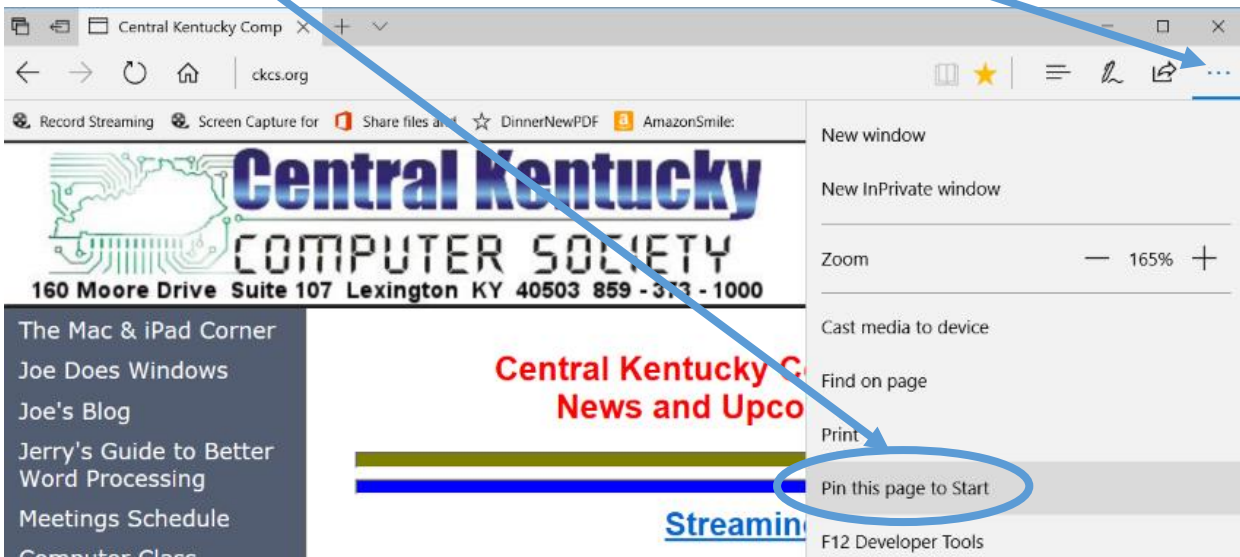

At the left of the address bar, left click the icon in front of the http or www and drag it to the desktop.

### IN MICROSOFT EDGE:

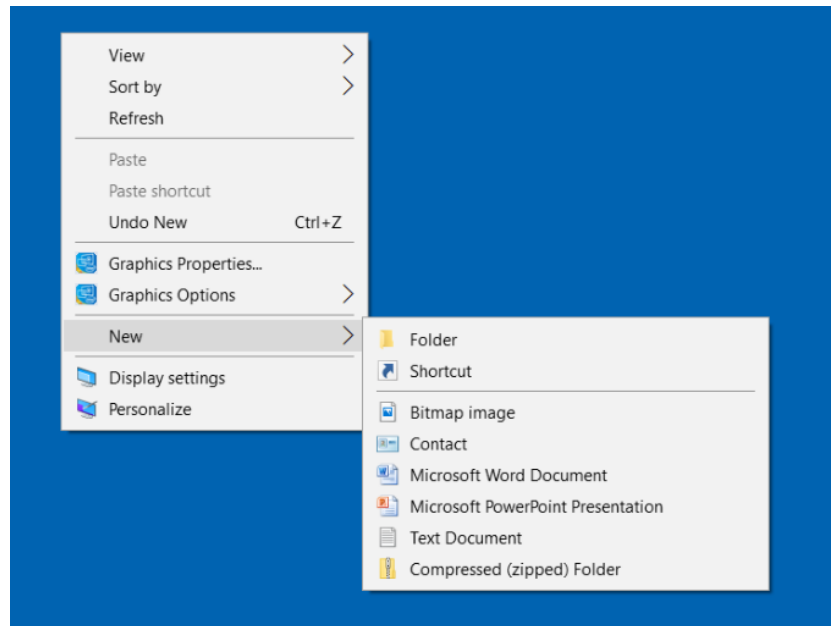

#### HOW TO PUT A WEBSITE AS A TILE ON THE START MENU

Open the web site (like CKCS) in Microsoft Edge, right click the 3 dots at the upper right, then click on PIN THIS PAGE TO START, click yes in the next menu.

## HOW TO PUT A WEB ADDRESS LINK ICON ON YOUR DESKTOP:

1. Highlight web address and do Control C to copy.
2. Right click the Desktop go down to New and click on Shortcut.

What item would you like to create a shortcut for?

This wizard helps you to create shortcuts to local or network programs, files, folders, computers, or Internet addresses.

Type the location of the item:

Click Next to continue.

3. Do Control V to copy and click on Next and name the icon, then click Finish.

What would you like to name the shortcut?

Type a name for this shortcut:

Click Finish to create the shortcut.

# Computer Security should be NUMBER ONE

By Ken Goodman

With the increased outbreak of security threats, I'm sure we are all very worried. There is an increasing number of threats that you need to protect yourself from. They include phishing attempts, ransomware, viruses, spyware, any new type of threat that the bad guys can think of. Well, we all need to be on our toes and protect ourselves. Therefore, **computer security should be your Number ONE concern.**

Here is a list of things I do and you should also do to protect ourselves from these threats:

1. Since the vulnerabilities were detected quickly, Microsoft patched them in Windows's 10 security updates. Microsoft has been on top of these threats and acts quickly. Therefore, two things we can derive from this:
  - a. Be on Windows 10
  - b. Keep up with the security updates
2. The next precaution is to never click on links that you do not expect. If you are expecting a link in an email or text that you expected from someone, you should be fairly secure in opening it. Otherwise, I would not click on the link or document. If one comes and you're not sure, first contact the sender directly (not through the link) to find out if and why it was sent.
3. It is imperative for your computer to have a highly-rated internet security package. If you can afford it, get one of the highly rated purchased products, or if you are on a budget, you can get one of the highly rated free packages. To determine which products are best, you can perform a Google search and review the results. Some of the highest rated paid packages include Norton Security, McAfee Security and Bitdefender. Some of the free packages include Avast internet Security, Outpost Security Suite and Comodo internet Security. Also, as an extra protection, I use Malwarebytes. Malwarebytes works alongside the other security suites. The free version cannot protect you from ransomware since it only runs when you manually start it. If you can afford it, I would buy the one that runs all the time and protects you on the go.
4. If you get a notice from a vendor or institution you are involved with **DO NOT CLICK ON THE LINK PROVIDED or CALL the NUMBER LISTED!** Instead, go directly to the website of the vendor or institution, or call the number that the vendor provides and then check out the information. For credit cards, the number is the back of the card and other vendors have their support numbers, or ways to contact them, on their websites or their bills.
5. The last suggestion is to back up your software often. I suggest two different approaches.
  - a. The first is a personal data backup. You can do this using Windows File History that is found in Settings or Control Panel. This should be done to an external drive. In case of an attack turn off your machine immediately and detach the external drive.
  - b. The other is a full disk backup. This will allow you to reinstall your system to a point prior to the attack. You should run this when you feel your system is at a place where it is stable. This does not have to be done as often. This can also be done through the Windows 7 Backup tool also found in Settings and Control Panel.

I hope these suggestions help and you never must worry about an attack on your computer.

Remember: **Make Computer Security your Number ONE concern.**

# If you hate remembering passwords, try a password manager

The CKCS Tech Night presentation, headed by Kenneth Tubaugh on July 10, offered solutions to keeping track and using passwords. Not just any password, but super secure ones up to 64 characters long with a mixture of numbers, caps and lower case letters and all sorts of symbols.

Those present that night named just four of many password manager programs available to members. He listed them on the white board in the photo at left. Some cost reasonable monthly or annual fees, but a few are free. Kenneth concentrated on 1Password, a program he has used for years. It was free until just recently when a \$3 charge per month has been announced.

With a PM (password manager) the user only has to remember one strong password with which to access his/her personal PM program.

Setting up a PM program takes time. So to simplify the process, Kenneth recommended doing them one at a time – but only when you need to access a particular website or program. The PM program generates long and complicated passwords and keeps track of them for when you need them. For example, if you need to access the Apple website, once your PM has created your secure password and you changed it online with apple, all you have to do is remember your one password to access your PM program and then type in the name you assigned that site (such as) Apple, and the PM program does the rest. You get online and you only have one password you must remember – the one to access your PM program and it does the rest.

Kenneth expressed a willingness to assist anyone needing suggestions and answers to get going with the PM system. Although his expertise is only with the *1Password* program, he offers suggestions with any PM program you choose. He may be reached by using [kenneth.tubaugh@ckcs.org](mailto:kenneth.tubaugh@ckcs.org) to set a time convenient to call him. Of the programs listed on the white board, KeePass is free.

# The Fourth Generation Apple TV and Net Neutrality

by Betsy Johnson and Joe Settles

My family purchased our first television in 1953. We've come a long way since the 50's when we had just two television stations out of Louisville, Ky. I lived in rural Washington County as a child, and I remember walking outside to turn the antenna just to be able get a signal from these two stations. It was a two-man operation. I would turn the antenna until the person inside would shout, "Okay! We're in focus!"

Here's a little television trivia:

1926 - First public demonstration of a television set.

1928 - First analog television system. The first television station and broadcast of analog television signals.

1929 - Experimental broadcasting in England and Germany.

1930 - The first television drama is broadcast in London, "The man with the flower in his mouth."

1932 - BBC starts regular television broadcasting.

1941 - First advertisement is aired in New York.

1941 - Brooklyn Dodgers and Philadelphia Phillies ballgame is broadcast.

1946 - Color television begins broadcasting.

1947 - First broadcast of Howdy Doody.

1948 - Ed Sullivan show starts broadcasting.

1949 - The Lone Ranger begins broadcasting.

Today, we have the Apple TV, fourth generation.

This latest version of Apple TV has been updated in so many ways. The biggest advantage of the fourth generation Apple TV is that it has its own App store. It's an independent iOS device that does not have to be linked to AirPlay. So you can stream everything from music to movies, to exercise and shopping apps to games and more. And with the Siri Remote, you can do it all with the sound of your voice. For example, tell Siri the name of a movie you'd like to rent, and she'll find every site that has it available ( Amazon Prime, Hulu , Netflix, UTube, for example) and list the price. Or, if you are looking for an actor, you simply say, "Show me all of Pee Wee Herman's movies," and she will display every movie he's made and where to rent it.

You have a choice between the 64 GB and 32 GB Apple TV. The two devices are alike in every way. Both models have the ability to use an external drive for storage and both models will play 5.1/7.1 Dolby digital surround sound for your home theater or your sound stick.

The 32 GB Apple TV sells for \$149, while the 64GB Apple TV sells for \$199. It's very important to purchase the Apple Care protection plan for \$29 for two years. If anything goes wrong, Apple will replace it. There's also telephone tech support for any other issues that might occur. The HDMI cable is not included with the Apple TV, so this can be purchased at the Apple Store for \$29.

There is also another advantage to using the Apple TV fourth generation. There's no need for cable or satellite. Simply download the Direct TV Now app, which starts at \$35 a month. The

first month is free, and after that, your credit card will be charged through the app store. Since this app has DVR capabilities, you will be able to record movies or TV programs. This app can be used anywhere - at home or while you're traveling as long as you have access to WIFI. Apple TV communicates with all iOS devices – iPhone, iPad and the Apple Watch.

## Net Neutrality

In spite of the exciting innovations offered by Apple TV, one drawback of which everyone should be aware, is the subject of net neutrality. Net neutrality allows everyone to have the same access to the same information when using the internet. Net neutrality keeps the major internet companies from charging us based on what we have streamed. Net neutrality also means there are no corporate controls over any content.

In 2015, the FCC took steps to preserve net neutrality after millions of Americans demanded that the internet be protected from any type of corporate control.

This recent progress is now in jeopardy of being undone. There is a movement to divide the internet into "slow lanes" and "fast lanes" which would put restrictions on information and content. This would allow big corporations and the telecom industry more control over the information and content online. Obviously, this would have serious consequences if this is allowed to happen.

The internet should be a space for an open and free exchange of ideas and information for everyone, a place where individuals and businesses, large or small, are given the same opportunities as the multi-billion dollar corporations. Since its beginning, the internet has been a remarkable tool for the dissemination of information in this country. Ending net neutrality protection would be the end of a free and open internet. It's vital that the internet remain a space for an open exchange of ideas and information. 

**Joe Settles** has been a member of CKCS since 2005. He's taught Apple OS operating systems, photo editing applications, and a SIG on the third generation of Apple TV. He has also served two years on the Board of Directors.

**Betsy Johnson** is a new member to CKCS. She's looking forward to contributing articles, attending CKCS classes and improving her photography skills.

# New Members and Renewals

During the period from 6/25/2017 to 7/21/2017

We welcome the following new members who joined CKCS during this reporting period:

**Joe Bell  
Vickie Burke  
Jane Burton  
Tracy Elton  
Ann Galvin  
Nancy Strassner  
Rayford Sullivan**

We thank and welcome back the following members who renewed their memberships during this reporting period:

**Richard & Mary Bevevino  
Robert Barry Bingham  
Nancy & Allen Dawson  
Darrell W. Doty  
Tony & Nancy Goetz  
Lael F. Heflin  
Robert B. Johnson  
Jacob & Mary Karnes, Jr  
Tom Lillich  
Jane Ellen Myers  
Bettye Neal  
Jo Stratton**

*Information furnished by CKCS Board of Directors member Ben Rice*

— **CKCS**

# This Month's Best Videos / Shows

## SUGGESTIONS:

To view a video, just click on the appropriate link below. Once you finish viewing a video, if you maximized the video to full screen, minimize the image by clicking that same full screen icon.

Then click on the arrow in the upper left corner of your monitor. The arrow should look like one of the images at left. That should return you to the video page in the newsletter. If instead, it returns you to page 1 of the newsletter, a single click on the left blue section of the newsletter logo on page 1 and an invisible link should take you back to the video page you were on. If this does not work, let me know your experience and we will work on the problem. Use [newsletter@ckcs.org](mailto:newsletter@ckcs.org).

### At the movies

When the usher noticed a man stretched across three seats in the movie theater, he walked over and whispered, "Sorry, Sir, but you are allowed only one seat." The man moaned but didn't budge. "Sir," the usher said more loudly, "if you don't move, I'll have to call the manager." The man moaned again but stayed where he was. The usher left and returned with the manager, who, after several attempts at dislodging the fellow, called the police. The cop looked at the reclining man and said, "All right, what's your name, joker?" "Joe", he mumbled. "And where are you from, Joe?" Joe responds painfully, "The balcony!"

Furnished by Carl Peter

### The good old days of Vaudeville

There were lots of Jewish comedians. Here are some well know jokesters from those days: Shecky Greene, Red Buttons, Totie Fields, Joey Bishop, Milton Berle, Jan Murray, Danny Kaye, Henny Youngman, Buddy Hackett, Sid Caesar, Groucho Marx, Jackie Mason, Woody Allen, Lenny Bruce, George Burns, Allan Sherman, Jerry Lewis, Carl Reiner, Shelley Berman, Gene Wilder, George Jessel, Alan King, Mel Brooks, Phil Silvers, Jack Carter, Rodney Dangerfield, Don Rickles, Jack Benny, Mansel Rubenstein and so many others.

Here are some of their jokes which in those days would not contain a single swear word in their comedy.

- ◆ I just got back from a pleasure trip.  
I took my mother-in-law to the airport.
- ◆ I've been in love with the same woman for 49 years!  
If my wife ever finds out, she'll kill me!
- ◆ What are three words a woman never wants to hear when she's making love? "Honey, I'm home!"
- ◆ Someone stole all my wife's credit cards but I won't be reporting it.  
The thief spends less than my wife did.
- ◆ We always hold hands.  
If I let go, she shops.
- ◆ My wife and I went back to the hotel where we spent our wedding night; only this time I stayed in the bathroom and cried.
- ◆ My wife and I went to a hotel where we got a waterbed.  
My wife called it the Dead Sea.
- ◆ She was at the beauty shop for two hours. That was only for the estimate.  
She got a mudpack and looked great for two days. Then the mud fell off.
- ◆ The Doctor gave a man six months to live.  
The man couldn't pay his bill so the doctor gave him another six months.
- ◆ The Doctor called Mrs. Cohen saying,  
"Mrs. Cohen, your check came back. "  
Mrs. Cohen answered, "So did my arthritis!"

◆ Doctor: "You'll live to be 60!"

Patient: "I am 60!"

Doctor: "See! What did I tell you?"

◆ Patient: "I have a ringing in my ears."

Doctor: "Don't answer!"

◆ A drunk was in front of a judge.

The judge says, "You've been brought here for drinking."

The drunk says "Okay, let's get started."

◆ Why do Jewish divorces cost so much?

They're worth it.

◆ The Harvard School of Medicine did a study of why Jewish women like Chinese food so much. The study revealed that this is due to the fact that Won Ton spelled backward is Not Now.

◆ There is a big controversy on the Jewish view of when life begins.

In Jewish tradition, the fetus is not considered viable until it graduates from medical school.

◆ Q: Why don't Jewish mothers drink?

A: Alcohol interferes with their suffering.

◆ Q: Why do Jewish mothers make great parole officers?

A: They never let anyone finish a sentence!

◆ A man called his mother in Florida,

"Mom, how are you?"

"Not too good," said the mother. "I've been very weak."

The son said, "Why are you so weak?"

She said, "Because I haven't eaten in 38 days."

The son said, "That's terrible. Why haven't you eaten in 38 days?"

The mother answered, "Because I didn't want my mouth to be filled with food if you should call."

◆ A Jewish boy comes home from school and tells his mother he has a part in the play.

She asks, "What part is it?"

The boy says, "I play the part of the Jewish husband."

The mother scowls and says, "Go back and tell the teacher you want a speaking part."

◆ Q: How many Jewish mothers does it take to change a light bulb?

A: (Sigh) "Don't bother. I'll sit in the dark. I don't want to be a nuisance to anybody."

◆ Short summary of every Jewish holiday:

They tried to kill us. We won. Let's eat.

◆ Did you hear about the bum who walked up to a Jewish mother on the street and said, "Lady, I haven't eaten in three days."

"Force yourself," she replied.

◆ Q: What's the difference between a Rottweiler and a Jewish mother?

A: Eventually, the Rottweiler lets go.

Aah! Memories of the good ole days!

### FREDDY'S TOP TIPS TO IMPROVE YOUR COMPUTER PERFORMANCE AND SECURITY:

- » **Upgrade your hard drive to a SSD (Solid State Drive);** now 120GB and 250GB SSD drives cost under \$100.00; the SSD positive impact on the performance of a computer is simply unbelievable.
- » **Do Image Backups of your computer;** of the whole computer (OS, programs, settings, everything) and **no only your documents and personal files;** use Acronis Backup Software to do monthly (and weekly) completely unattended image backups of your computer to a second hard drive (a USB connected one but preferable an internal one).
- » **Use MalwareBytes software to protect against malware;** and better yet use the Premium version (only \$15 per computer per year);
- » **Windows 10 is GOOD and free** (for existing Windows 7 and Windows 8 computers)! Welcome back to the Windows 7 like interface that most everybody feel at home with. Please be also aware that Windows 10 expand the amount of information obtained by Microsoft from your computer usage (more on it can be read at many places online including <http://www.polygon.com/2015/7/31/9075531/windows-10-privacy-how-to>).
- » **Make sure that you are visiting the website that you really want to visit;** there are many misleading sites that try to trick you into believing that they are the intended legit site ... but they are not! Be careful with the spelling of the name of a site; be careful with the first "findings" of the search engines; most times they are no findings but (many times deceptive) advertising.
- » **If somebody call you about the "problems of your computer" simply hang off;** they are not legitimate people so do not even waste your time even threatening them.

# CKCS List of Special Interest Groups

Each month the Central Kentucky Computer Society offers eleven Special Interest Groups (SIGs) which may be attended by members and their guests. Visitors are cordially invited to become active CKCS members. Starting times of SIGS are as indicated in the listing. Always check the “Monthly Schedule” and the “Newsletter” link on the CKCS home page for any schedule changes [www.ckcs.org](http://www.ckcs.org)

## ANDROID SIG

**Meets monthly on the third Tuesday at 7 p.m. – Leaders are Boone Baldwin, Bob Brown, and Kenneth Tubaugh**

The Android SIG is dedicated to covering the world's most widely used mobile operating system, Android's abundant variations, the hardware that runs it, and all things concerning Google's parent company, Alphabet Inc. Our contributors include technology enthusiasts and professionals in the industry who have come together under a united passion: a love of mobile technology. This group is open to anyone interested in discussing the Android ecosystem, contributing tips and tricks, promoting apps, sharing experiences, and exploring Alphabet Inc. related news.

better understand digital imaging, learning how to get the best out of their cameras and how to improve their images with digital imaging software such as Corel's Paint Shop Pro, Photoshop CS/Elements, Gimp or other program. Each meeting starts with a photo contest with a variety of different categories.

## DR. FIXIT SIG

**Meets monthly on the first Saturday at 10 a.m. – Leaders are Bob Brown, Ben Rice, James Osborne, and Mike Seiler.**

Bring in your sick computer for evaluation. Our 'experts' will diagnose the problem and if possible make simple repairs. All you need to bring is the CPU. Our leaders will use a mouse and monitor we have on hand.

## DATABASE SIG

**Meets monthly on the fourth Monday at 7 p.m. – Leader Garland Smith**

## DIGITAL PHOTOGRAPHY SIG

**Meets monthly on the fourth Tuesday at 7 p.m. – Leader Joe Dietz**

The Digital Photography Special Interest Group is a forum to provide and share information about digital imaging. The SIG frequently has guest speakers to cover a wide range of topics that are related to digital imaging. Some of our past topics have been on digital archiving (AKA Backup), getting the best out of your point and shoot camera, effective lighting when taking pictures, restoring old photos and many others. The goal of this SIG is to help attendees to

## iHELP SIG

**Meets monthly on the first Saturday at 10 a.m. in the classroom. iHelp leaders Jeannine Essig, Lilly Crawley, Janet Cartmell, Kurt Jefferson, Joe Settles, Brooke Thomas and Joe Dietz**

Bring your questions about Apple iPhone, tablets and computers. Our iHelpers offer one-on-one advice and suggestions. It is best if you bring your Apple devices, fully charged when you come.

## MAC AND iPad SIG

**Meets monthly on the second Thursday at 7 p.m. – Leader Kurt Jefferson**

Attendees are encouraged to bring their Mac laptops and iPad tablets to experience firsthand the tips provided at each meeting. Whether you're a beginner to the Mac or iPad, or you've been using both devices for several The Mac and iPad SIG tackles issues to help make both Apple's Mac computers and its iPad tablet easier to use and more enjoyable. We deal with a variety of topics ranging from Mac OS X (pronounced "10") to iOS, the operating system running Apple's iPad. We share tips at every meeting and provide insights to empower users to get more out of their Macs and their iPads. Users years, you'll walk away with plenty of tips, tricks, and advice to make your computing experience more enjoyable.

## MICROSOFT ACCESS SIG

**Meets monthly on the third Thursday at 7 p.m. – Leader Stuart Zahalka**

## TECH CHAT SIG

**Meets monthly on the first Thursday at 1:30 p.m. Leader Bob Brown**

Keeping up with personal and home technology is getting harder. New products and new internet services are coming rapid fire. The purpose of the Tech Chat Group is to talk about technology as it happens. We are trying to stay aware of new ideas and understand what impact they will have on us.

## WINDOWS SIG

**Meets monthly on the second Tuesday at 7 p.m. – Leader Mike Seiler**

Topics covered may be: Windows 10, Cortana, EDGE, Alarms & Clock, PHOTOS, Google Maps, Spotify, Settings, Mail, Control Panel, System Restore, Disk Cleanup, Desktop, Taskbar.

## WORD PROCESSING SIG

**Meets monthly on the first Tuesday at 1:30 p.m. Leader Larry Trivette**

The Word Processing SIG starts with questions from classmates where the SIG leader and all attending help provide solutions and answers. In fact, many of the topics presented during each session come from questions received by email during the month. Topics are presented so that new as well as advanced computer users will benefit by attending. This workshop uses several Microsoft Word versions during the SIG.

## UNIX / LINUX SIG

**Meets monthly on the fourth Thursday at 7 p.m. – Leader Lewis Gardner**

The Linux SIG handles a wide range of technical topics. Linux is based on Unix which is the granddaddy of modern networking. We spend a considerable amount of time on servers, networks, routers, access points and general network configuration. These operating systems are at the heart of many devices in our increasingly connected world. Come out and we will try to get your questions answered, your problems troubleshot or devices configured.
